Career Objective

Enthusiastic **Java Full Stack Developer** with **1+ years of hands-on experience** in designing and maintaining dynamic, scalable web applications. Proficient in Java, Spring Boot, and Angular, with a proven ability to optimize performance, troubleshoot complex issues, and deliver secure and high-performing software. Eager to contribute to innovative projects while advancing technical expertise.

Technical Skills

• Programming Languages	: Java, JavaScript, TypeScript
• Front-End Technologies	: HTML5, CSS3, Bootstrap
• Back-End Frameworks	: Spring Boot, Hibernate, Spring, SpringMVC
• Databases	: MySQL, MongoDB, OracleSQL
• Version Control	: Git, GitHub
• Build Tools	: Maven, Gradle
• Web Services	: RESTful APIs, SOAP
• Testing Tools	: JUnit, Mockito
• Other Tools	: IntelliJ IDEA, Visual Studio Code, Docker, Jenkins, JIRA, Eclipse EE

Education

- **B.E., Biomedical Engineering** **83%**
Mahendra Institute of technology | Graduated: 2024

Professional Experience

Java Full Stack Developer

GlobalLife | Nov 2023 – Present

- Designed and implemented **microservices architecture** using Spring Boot to ensure modular and maintainable systems.
- Optimized API response times by implementing efficient **caching mechanisms** with Redis.
- Created reusable **UI components** with Angular for consistency across projects and reduced development time.
- Integrated secure **OAuth2-based authentication** for user and admin roles.
- Designed and optimized database schemas for better performance and scalability.
- Conducted **code reviews** and provided mentorship to junior developers for coding best practices.

- Automated CI/CD pipelines using **Jenkins and Docker** for seamless deployments.
- Worked on debugging and resolving **complex back-end issues**, improving the system's overall stability.
- Collaborated with cross-functional teams to analyse, design, and deliver **end-to-end solutions** for client projects.
- Created and maintained comprehensive **unit and integration tests** using JUnit and Mockito to ensure software reliability.

Key Projects

E-Commerce Platform

- **Role:** Full Stack Developer
- **Technologies:** Java, Spring Boot, HTML, CSS, JavaScript, MySQL, Redis
- **Responsibilities:**
 - Designed and implemented a scalable product catalogue system with advanced search and filtering options.
 - Integrated a secure **payment gateway** and ensured compliance with industry security standards (PCI DSS).
 - Enhanced front-end performance using Angular lazy loading and minimized HTTP requests.

Work Order Management System

- **Role:** Front-End Developer
- **Technologies:** Java, MongoDB
- **Responsibilities:**
 - Developed dynamic, real-time dashboards and charts for visualizing project progress and metrics.
 - Collaborated with the back-end team to design and implement APIs for seamless data exchange.

Inventory Management Tool

- **Role:** Full Stack Developer
- **Technologies:** Java, Spring Boot, JavaScript, PostgreSQL
- **Responsibilities:**
 - Built a robust inventory tracking system with role-based access control.
 - Implemented scheduled batch jobs to generate daily, weekly, and monthly reports.
 - Optimized database queries for real-time analytics and reduced query execution time by 40%.

Yours truly
