PROFILE

Results-driven DevOps Engineer with 3 years of experience in designing, managing, and optimizing cloud infrastructure on AWS. Proficient in implementing CI/CD pipelines, Infrastructure as Code (IaC), and container orchestration to enhance automation, scalability, and system reliability. Passionate about streamlining development workflows and improving deployment efficiency.

PROFESSIONAL EXPERIENCE

Atos, Pune

(June 2022 - May 2025)

Senior Associate Engineer (Cloud/DevOps)

- Managed and optimized cloud infrastructure on **AWS**, ensuring high availability and performance of services and Linux-based servers.
- Automated 15+ repetitive tasks using **Bash scripting**, leading to a 25% increase in team productivity and reducing manual effort by 30 hours per week.
- Configured and managed over 20 **Jenkins pipelines**, resulting in a 40% reduction in build and deployment times across 5+ projects.
- Managed 30+ **Docker containers** and collaborated in orchestrating **Kubernetes clusters**, enhancing application deployment speed by 35% and improving scalability for high-traffic applications.
- Implemented **Terraform scripts** to automate the provisioning and configuration of AWS resources, achieving a 100% consistency rate in infrastructure deployment across multiple environments.
- Automated infrastructure provisioning and configuration management using **Ansible**, reducing deployment time and minimizing configuration drift.
- Automated routine tasks and deployments using **Groovy** scripting, resulting in a 30% reduction in manual effort.
- Improved **CI/CD pipeline efficiency** by integrating tools like **SonarQube** for code quality checks and **Trivy** for container vulnerability scanning, enhancing **code security and reliability**.
- Optimized cost and resource usage by setting up AWS CloudWatch and implementing scheduled autoscaling and rightsizing policies, resulting in a **20% reduction in monthly cloud costs**.
- Configured monitoring and alerting using **Prometheus and Grafana**, ensuring proactive issue detection and improved system observability.
- Utilized **Git** for **version control** and engaged in collaborative efforts with development teams to efficiently integrate code changes.
- Integrated security best practices for DevOps pipelines, including **IAM roles, VPC security groups, and automated vulnerability scanning**.

TECHNICAL SKILLS

- **Cloud & Infrastructure:** AWS (EC2, S3, IAM, RDS, VPC), Linux (Ubuntu)
- **CI/CD Tool:** Jenkins
- **Containerization:** Docker, Kubernetes
- **Infrastructure as Code:** Terraform
- **Configuration Management:** Ansible
- **Scripting Languages:** Groovy, Shell
- **Version Control System:** Git, GitHub
- **Monitoring & Logging:** Prometheus, Grafana
- **Databases:** MySQL
- **Networking & Security:** Firewalls, Load Balancers, IAM Policies

PROJECTS

FinanceMe Microservices Migration and Automation

- Led the migration of **FinanceMe's monolithic system** to a microservices architecture on **AWS**, improving scalability and fault isolation.
- Designed a **CI/CD pipeline** using **Jenkins**, ensuring automated **builds, testing, and deployments** with zero downtime.
- Developed **Spring Boot microservices** and optimized containerized deployments using **Docker and Amazon ECS/EKS**.
- Automated **cloud infrastructure provisioning** with **Terraform**, configuring **VPC, EC2, RDS, and ALB** for high availability.
- Enhanced deployment efficiency by implementing **Ansible** for configuration management and **Selenium** for automated testing.
- Set up **end-to-end monitoring** with **Prometheus and Grafana**, improving the observability of the system and proactive resolution of problems.
- **Impact:** Reduced deployment time by **40%**, improved system reliability, and enabled faster feature releases.

Medicure : Healthcare Domain

- Designed and developed a **Spring Boot microservice** with an **H2 in-memory database** to efficiently manage doctor records, ensuring quick and reliable data retrieval.
- Configured a **CI/CD pipeline** using **Jenkins, Git, and Docker**, automating code integration, testing, and deployment.
- Orchestrated containerized microservices on **Kubernetes**, enabling seamless scaling and automated load balancing.
- Leveraged **Terraform** to implement **Infrastructure as Code (IaC)**, dynamically provisioning cloud resources and reducing manual setup.
- Automated server configuration with **Ansible**, ensuring consistency across environments and minimizing deployment risks.
- Integrated **Selenium** for automated testing, enhancing application reliability and reducing manual QA efforts.
- Established **real-time monitoring** using **Prometheus and Grafana**, improving system observability and proactive issue detection.
- **Impact:** Reduced manual intervention by 60%, **ensured zero downtime during deployments**, and enhanced system reliability.

Education

BE in Computer Engineering | Ramrao Adik Institute of Technology, Nerul

(2018 - 2022)

- CGPA: 7.8

Certification

- AWS Certified Cloud Practitioner
- DevOps Engineer
- DevOps Fundamentals
- Scalable Web Applications on Kubernetes
- Docker Essentials
