EDUCATION

Easwari Engineering College

B.E ECE 8.64 CGPA

2017 - 2021

SKILLS

- React with Redux
- Python
- GitHub API's and Azure DevOps REST API
- Problem-solving skills
- Design and development

PROFILE

Highly motivated and detail-oriented software engineer with a strong foundation in problem-solving and clean coding practices, specializing in JavaScript and Python. Seeking a challenging role within an innovative software development team where I can leverage my technical skills and contribute effectively to the team's success.

WORK EXPERIENCE

ASSOCIATE SOFTWARE ENGINEER

Hexaware Technologies

2021 - 2022

- Developed a robust, industry-grade documentation site for an enterprise application utilizing Docusaurus. The site boasts user-friendly navigation, efficient search capabilities, and comprehensive versioning support.
- Design and implement a secure OTP (One-Time Password) validation system leveraging Azure Email and Communication Services.

SOFTWARE ENGINEER

Hexaware Technologies

2022 - Present

- Developed a dental website for a U.S.-based client, featuring complex interfaces like a teeth chart to help dentists track patient status. Leveraged Kendo UI to create visually appealing components. Gained hands-on experience in building intricate screens using React and JavaScript.
- Developed an application enabling users to integrate with their task boards, create stories and tasks using AI assistance, and manage work boards seamlessly within the platform. Utilized Redux for efficient handling of complex data storage and access throughout the application.
- Developed APIs in Python to streamline task and project management functionalities, utilizing both the Jira and Azure DevOps REST APIs. Implemented endpoints for creating, updating, and deleting stories and epics, retrieving project lists within an Azure DevOps organization, and accessing boards in specific projects. This enabled robust, two-way communication between backend task management systems and the frontend application, enhancing user experience with real-time data synchronization and streamlined workflows.
