LinkedIn: <https://www.linkedin.com/in/vinoth-kumar-024476142>

Personal Particulars:

Date of Birth: 23-12-1996 | Gender: Male | Coimbatore.

Professional Summary

Results-driven Frontend Developer with **4.6 years of experience** in building scalable and dynamic web applications. Proficient in **Angular and Java Spring Boot** (basics). Strong expertise in **JavaScript, TypeScript, RxJS, RESTful APIs**, and modern UI/UX best practices. Adept at **developing responsive applications**, optimizing performance, and collaborating in agile teams.

Skills & Technologies

- **Frontend:** Angular, RxJS, HTML5, CSS3, SCSS, Tailwind, Bootstrap
- **JavaScript & TypeScript:** ES6+, Async/Await, Promises, Webpack
- **Backend Basics:** Java Spring Boot, RESTful APIs
- **State Management:** NgRx, Context API
- **Database:** MySQL, SQL
- **DevOps & Tools:** Git, GitHub, Jenkins, Postman
- **Testing:** Unit & Integration Testing
- **CI/CD & Agile:** JIRA, Scrum, Agile Methodologies

Professional Experience:

TURBOCODE TECHNOLOGY, Coimbatore | Front-End Developer | (Dec 2022 – Present)

Tech Stack: Angular, TypeScript, RxJS, Java Spring Boot (Basics), REST APIs

- Developed and maintained **scalable Angular applications** with optimized UI/UX.
- Integrated **Java Spring Boot-based microservices** and RESTful APIs to ensure smooth data flow.
- Leveraged **RxJS for handling reactive programming** and optimizing API calls.
- Implemented **NgRx store for state management**, reducing API dependency and improving performance.
- Ensured **cross-browser compatibility** and optimized applications for performance and accessibility.
- Collaborated with **backend teams** to design and implement RESTful APIs.

Angular Projects

1. DMS – Dealer Management System (Toyota - Malaysia)

Comprehensive dealer platform for Toyota covering multiple modules like Sales, Pre-Sales, Finance, Marketing, OSMS, Customer & Vehicle Management.

Tech Stack: Angular, RxJS, REST API, Bootstrap

Key Features:

- Modular architecture with lazy loading
- Form-based data entry with dynamic validation
- Role-based access and workflow navigation

2. UCMS – Used Car Management System (Mitsubishi - Malaysia)

A full lifecycle platform for used car appraisal and sales tracking.

Tech Stack: Angular, Spring Boot, Reactive Forms, Material UI

Key Features:

- Car appraisal engine with rating points
- Sales status tracking and user dashboard

3. Ed Abstraction – Intelligent Data Extractor

AI-powered tool to extract structured data from large documents like PDFs.

Tech Stack: Angular, TensorFlow/AI APIs, File Parser

Key Features:

- File upload with format validation
- Integration with AI for auto-tagging and field detection

4. Manday's – Project & HR Management System

An integrated system combining Jira-like project tracking and HR features.

Tech Stack: Angular, Chart.js, REST APIs

Key Features:

- Project progress tracking via sprint charts
- Timesheet, leave tracking, and resource allocation

5. FMS – Food Management System

Restaurant digitization platform with QR-based ordering and table booking.

Tech Stack: Angular, QR Scanner Library, Local Storage

Key Features:

- Contactless food ordering via QR
- Table reservation and order management
- Waiter interface and order status sync

6. E-Commerce Platform

Hyperlocal shopping portal connecting users with nearby stores and supermarkets.

Tech Stack: Angular, RxJS, Firebase/REST API

Key Features:

- Product listing, cart, and checkout
- Store locator and delivery slot selection

Java Spring Boot Projects

1. UCMS – Backend for Used Car Management System (Mitsubishi - Malaysia)

Spring Boot REST APIs to handle car appraisal, sales flow, and user management.

Tech Stack: Java Spring Boot, Micro services, Hibernate, MySQL, REST APIs

Key Features:

- Secure authentication and authorization
- CRUD operations for car appraisal & sales
- API integration with Angular frontend

NTC Logistics India (P) Limited, Chennai | Front-End Developer | (Nov 2020 – Nov 2022)

Tech Stack: Angular, TypeScript, RxJS, JavaScript, HTML5, CSS3, SCSS

- Developed and maintained Angular applications with a strong focus on modular architecture and reusability.
- Utilized **RxJS** for managing asynchronous operations and reactive state handling..
- Created **responsive UI components** using Tailwind, Bootstrap, and Material UI.
- Implemented **Reactive Forms** with custom validations to handle complex user input scenarios.
- Integrated RESTful APIs using Angular's **HttpClient** and managed data with observables and operators.
- Improved application performance through **lazy loading**, **OnPush change detection**, and code splitting.
- Collaborated closely with UX/UI designers to develop **pixel-perfect, responsive interfaces** using Bootstrap and SCSS.

Angular Projects

1. BT Lab – Online Doctor Booking System

A healthcare web application built using Angular to help users book doctor appointments, explore nearby doctors, and view their success rates and availability.

Tech Stack: Angular, TypeScript, RxJS, REST API, Bootstrap

Key Features:

- Doctor search with filters and geo-location
- Appointment scheduling
- Patient-doctor communication interface

2. Ticket List – Project Tracking System (Jira Replica)

A project and task tracking system inspired by Jira, developed using Angular for managing sprints, backlogs, and team assignments.

Tech Stack: Angular, TypeScript, RxJS, Context-like Shared Services, REST API, SCSS

Key Features:

- Sprint and backlog management
- Task creation, assignment, and tracking
- User roles and permission handling

Education:

- BE.ECE - Paavai Engineering College (2014-2018), Namakkal.
- HSC & SSLC - Bharani Park Matric Hr. Sec. School, Karur.

Soft Skills:

- Strong problem-solving & analytical skills
- Excellent collaboration & teamwork
- Effective communication & adaptability

Declaration:

I hereby declare that the information and facts stated above are true and correct to the best of my knowledge and belief.

Yours sincerely,
(J. VINOTH KUMAR)
