PROFESSIONAL SUMMARY

Software Test Engineer with hands-on experience in test automation, quality engineering, and CI/CD integration. Proficient in developing automation frameworks using Selenium WebDriver, Java, and BDD methodologies. Strong programming skills with expertise in creating reusable test components and implementing testing best practices across web applications.

TECHNICAL SKILLS

- **Programming Languages:** Java, SQL
- **Test Automation Frameworks:** Selenium WebDriver, TestNG, Cucumber (BDD), Page Object Model (POM), Hybrid Framework
- **API Testing:** Postman, REST Assured
- **CI/CD & Version Control:** Jenkins, GitHub, Maven, GitHub Actions
- **Databases:** MySQL, MongoDB
- **Testing Types:** Functional, Regression, Smoke, Sanity, Negative, API Testing
- **Tools:** Jira, GitHub, Cucumber Studio, Eclipse
- **Methodologies:** Agile/Scrum, SDLC, Software Testing Life Cycle (STLC)

PROFESSIONAL EXPERIENCE

Automation Tester

July 2025 – January 2026

Ziegler Aerospace, Hyderabad, Telangana, India

- Developed and maintained automated test scripts using Selenium WebDriver with Java, implementing Page Object Model (POM) and BDD Cucumber frameworks for enhanced code reusability and maintainability
- Designed and implemented comprehensive test automation solutions covering functional, regression, smoke, and sanity testing across multiple application modules
- Collaborated with cross-functional development and QA teams to identify test scenarios, analyze requirements, and ensure product quality throughout the SDLC
- Integrated test automation with CI/CD pipeline using Jenkins and Maven for continuous testing and build automation
- Performed API testing using Postman to validate RESTful services and ensure backend functionality
- Analyzed test results, documented defects in Jira, tracked defect lifecycle, and performed retesting to verify fixes
- Created detailed test cases, test scenarios, and test data based on business requirements and user stories
- Utilized GitHub for version control and collaborative development of automation frameworks
- Actively participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives
- Implemented reusable components using TestNG assertions and custom XPath locators for robust test automation

EDUCATION

Bachelor of Technology in Electronics and Communications Engineering

2019 – 2023

Aditya Engineering College

KEY ACHIEVEMENTS

- Built scalable automation framework using Selenium, Java, and TestNG with POM architecture, reducing test execution time and improving test execution time by 40% and improved test coverage
- Identified and reported 80+ critical and high-priority defects through comprehensive test execution, contributing to improved application stability and user experience
- Contributed to GitHub repository with well-documented automation scripts and reusable test components
