

PROFESSIONAL SUMMARY

- ✓ Possess around 4 yrs of experience in IT industry specializing in AWS & Azure services(IaaS, PaaS and SaaS) managing continuous integration and continuous deployment methodology
 - ✓ Hand-on experience in Implementing Azure Services, such as Azure Active Directory, Azure App Service, Azure Resource Manager, Azure VMs, Blob Storage, Azure Monitor
 - ✓ Experience in Building VMs using the Azure portal to Provide Flexibility for IaaS based solutions and Virtual Machine Scale Sets using Azure Resource Manager (ARM)
 - ✓ Experience in migrating on-premises applications to Azure
 - ✓ Strong knowledge of DevOps, CI/CD pipeline & GIT to maintain source code
 - ✓ Hands on experience on both Classic editor and YAML pipelines in Azure DevOps
 - ✓ Experience on GITHUB actions and circleCI based deployments
 - ✓ Hands on experience on Azure Frontdoor, Application gateway and Cloudfront
 - ✓ Designed Network Security Groups (NSGs) to control inbound and outbound access to network interfaces (NICs), VMs and subnets.
 - ✓ Hands on experience on AWS cloud infrastructure, working experience of multiple AWS services, EC2, LightSail, CloudFormation and CloudTrail
-

EDUCATION

Bachelor of Technology

2015-2018

Vaagdevi College of Engineering, Warangal

CERTIFICATIONS

Microsoft Azure AI Fundamentals (AI-900)

EXPERIENCE

Senior DevOps Engineer

Oct, 2022 - Jan, 2025

Mysense Technologies | Mohali

DevOps Engineer

May, 2021 - Sep, 2022

Aadhyam Solutions pvt ltd | Delhi

ROLES & RESPONSIBILITIES:

- Creating Projects, Branching, Merging, and Access allocation to users as per organization rules and standards.
 - Designing, Provisioning Infrastructure as a Code, Migration of On-Premise applications to cloud using Microsoft Azure Cloud IaaS, PaaS and Microsoft Azure DevOps.
 - Providing L3 Support & Troubleshooting the issues related to Windows and Web Applications, SQL Server and Services hosted in Azure/AWS.
 - Investigating production issues, analyzing logs, performing root cause analysis, and proposing appropriate solutions.
 - Collaborating with development teams to address application issues, and server related issues.
 - Managing IT infrastructure components such as VMs, AD, SSL Certificates and firewalls.
 - Hands-on experience in creating P-links & Azure frontdoor and cloud front services
 - Using GIT, Azure DevOps & AWS code commit Services for Source Code Repository and CI/CD.
 - Responsible for Change Management and Coordination across all the development and deployment teams to ensure the proper & timely release of projects.
 - Experienced in building, deploying and integrating PHP, Java-based and Dot Net applications.
 - Creating ARM templates & Cloud formation templates to reuse similar deployment with some standard configurations and naming conventions
 - Scale up and scale down various services like VMs, SQL Servers.
 - Preparing the recovery services vault and finalizing the azure resources.
 - Creating repositories, new users for GIT and giving the permissions to users to access repositories.
 - Created images for Docker container and uploaded to Docker Hub.
 - Installing the azure VM Agents for integrating the Azure Backup services and pipeline agents
 - Assigned Roles and Policies to Users, Security Groups by using Identity and Access Management (IAM).
 - Automated Continuous Integration builds, deployments and unit tests across multiple different environments (DEV, QA, Pre-prod and Production).
-

SKILLS

Cloud Technologies:	Azure, AWS
Azure services:	DevOps, App Services, Front Door, AD, ARM, App Insights, Monitor, Blob Storage, VMs, Diagnostics and Analytics, Azure Key Vault, Vnet, NSG
AWS Services:	EC2, LightSail, IAM, S3, CodeBuild, CloudFormation, Guard Duty and SNS services
Version Tools:	Azure Repo, GIT, AWS CodeCommit
CI Tools:	Azure DevOps, AWS CodePipeline, Git Actions, Circle CI
Web servers:	Apache, Nginx, IIS
Database:	SQL Server, MySQL & Postgres
Monitoring Tools	New relic, Azure monitor, AWS cloudwatch
