Professional Summary:

I'm a front-end developer with 2.5 years of experience building scalable and responsive web applications using Angular, JavaScript, TypeScript, HTML, and CSS. Skilled in turning UI designs into clean, functional code and integrating with backend services for a smooth user experience. Comfortable working in agile teams, handling end-to-end feature development, and improving application performance. Eager to take on more responsibility, contribute to larger projects, and continue building high-quality, user-focused web applications.

Technical Skills:

- Web Technologies:
 - Angular, HTML5, CSS3, JavaScript, Typescript, Bootstrap, MongoDB
- Programming Languages:
 - C, C++, Java
- Tools:
 - Visual Studio Code, Git
- Cloud Platforms:
 - AWS
- Additional Skills:
 - Comfortable working in Linux environments, including terminal-based navigation, file permissions, and shell scripting basics.
 - Currently exploring DevOps tools and practices such as CI/CD pipelines, Docker, Kubernetes, and cloud deployment.

Professional Experience:

Front-End Developer

Infosys Limited | Apr 2022 - Sep 2024

- Developed and maintained responsive, user-friendly interfaces using Angular, TypeScript, HTML, and CSS.
- Integrated **REST APIs** using **Angular services** and **RxJS** for seamless data handling and real-time updates.
- Created reusable UI components to ensure consistency across modules and reduce development time.
- Implemented **routing, form validations, and dynamic data binding** to enhance the user experience.
- Worked in agile teams, participating in daily stand-ups, sprint planning, and code reviews to ensure on-time delivery.
- Performed performance tuning by optimizing Angular **change detection** and reducing load times.
- Used **Git** for version control and contributed to CI/CD pipelines for smooth deployments.
- Supported cross-browser testing and fixed UI bugs across Chrome, Firefox, and Safari.
- Documented key features and provided knowledge transfer to teammates and business stakeholders.

Projects:

Project Name: Web Kanban Modernization

Project Description: The client is a leading automotive company focused on expanding its brand presence across global markets, targeting key demographic regions to drive growth.

Responsibilities:

- Contributed to the modernization of a legacy web-based Kanban system into a modern, **responsive** Angular application to enhance usability and performance.
- Transformed static wireframes and Figma designs into dynamic, mobile-friendly web pages using Angular and CSS.
- Built reusable components and implemented **Angular routing and data binding** to enable seamless user interactions and page transitions.
- Integrated **REST APIs** to fetch and display real-time data for Kanban board activities such as material flow, work-in-progress tracking, and inventory status.
- Collaborated with cross-functional teams including designers, testers, and backend developers to ensure a smooth and timely delivery.
- Improved application performance by optimizing change detection and reducing unnecessary **DOM updates**.
- Conducted regular UI testing and bug fixing to ensure a consistent user experience across different browsers and devices.
- Actively participated in daily stand-ups and sprint reviews as part of the **Agile** development cycle.

Education:

Bachelor of Technology in Computer Science & Engineering

DVR & DR. HS MIC College of Technology – Kanchikacherla, Andhra Pradesh

Jun 2017 – Aug 2021

CGPA: 7.86

Certifications:

- C++ Programming – NPTEL (IIT-certified)
- Infosys Certified Front End Web Developer
- Infosys Certified Angular Professional
- Infosys Certified Global Agile Developer
