

Tanishk Pandey

Gurgaon, India | pandeytanishk@gmail.com | 9302928158 | tanishkpandey.com | LinkedIn | Github

Skills

Languages: JavaScript, TypeScript, Go, Python

Frontend: React, Next.js, Redux, Material-UI, Tailwind CSS, SaaS, Charts.js, React Testing Library

Backend: Node.js, Express.js, NestJS, REST APIs, GraphQL APIs, WebSockets, Webhooks

Database and ORM: MongoDB, MySQL, Redis, InfluxDB, Mongoose, Sequelize, Prisma

Cloud DevOps: Docker, Kubernetes, AWS, Nginx, CI/CD (GitHub Actions, GitLab CI/CD)

Scalability Security: Caching Strategies, Load Balancing, Rate Limiting, Auth N and Auth Z (JWT, OAuth 2.0)

Monitoring Observability: Prometheus, Grafana, Logging

Other Tools: Linux, Git, GitBash, RabbitMQ, Kafka, Bash Scripting

Software Architecture: Microservices, Microfrontends, Event-Driven Architecture

Experience

Associate Software Developer, Makse Group – Gurgaon, India

[Jan 2025 – Present]

- Created a custom Business process for a multi-approval employee conflict disclosure system on the Workday cloud platform.
- Used Workday Prism Analytics and GraphQL to generate insights into conflict mitigation.
- Used Workday Integration to seamlessly integrate an AI-driven recommendation model to suggest optimal conflict resolution strategies for mitigation.

Jr. Software Developer, IMZ Corporate – New Delhi, India

[Jan 2023 – Jan 2025]

- Implemented polygon-based geofencing and real-time spatial analytics using HERE Maps API, enabling precise vehicle tracking and dynamic route mapping for fleet management.
- Engineered a high-throughput live tracking system using WebSockets, Redis, and MongoDB, ensuring low-latency updates and real-time vehicle telemetry with efficient connection pooling and event-driven architecture.
- Built a multi-tenant account system with MongoDB, utilizing tenant-based sharding strategies for data isolation, performance optimization, and secure access control per organization.
- Developed a high-performance event-driven reporting module using InfluxDB, optimizing time-series queries and aggregations for real-time analytics and historical trend visualization.
- Designed and implemented a scalable architecture combining microfrontends (using Webpack Module Federation) and microservices, enabling independent deployments, dynamic UI module loading, and seamless cross-team collaboration across front-end and back-end services.
- Integrated robust authentication authorization systems using OAuth 2.0, JWT, API Gateway, and RBAC policies, ensuring data security and access control across services.

Education

Shri Shankaracharya Technical Campus, B.Tech

[June 2019 – June 2023]

- CGPA: 8.6/10

Certifications

- MERN Stack Developer from Geeks for Geeks

Intrests

- Playing Sports like Badminton and Table Tennis
- Reading Non-fictional Books
