Professional Summary

Results-driven GCP Data Engineer with hands-on experience in designing, developing, and automating end-to-end ETL pipelines using BigQuery, Dataflow, Cloud Composer, and Airflow. Skilled in Python, SQL, and PySpark for data transformation and analytics. Proficient in CI/CD (Docker, Jenkins, Kubernetes), data modeling, and performance optimization across large-scale cloud data environments.

Key Skills

Technical Skills	Soft Skills & Tools
Cloud Platforms: GCP (BigQuery, Dataflow, Composer, Storage, Dataproc), Snowflake, AWS (basic)	Soft Skills: Communication, Teamwork, Analytical Thinking
Programming: Python (PySpark, Pandas, NumPy), SQL (MySQL, Oracle)	DevOps: Docker, Kubernetes, Jenkins, Git, GitHub, Cloud Build
Big Data: Spark, Hive, Hadoop, Sqoop	OS: Windows, Linux

Work Experience

Software Developer Trainee | Asti Infotech Pvt Ltd | Bangalore **Dec 2021 – Dec 2022**
Performed end-to-end backend development activities including Java, Spring Boot, Hibernate, RESTful API development, Swagger documentation, JUnit testing, CI/CD implementation (Docker, Jenkins), Eureka service discovery, Log4j logging, SQL optimization (MySQL, Oracle), Agile practices (Scrum, sprint planning, stand-ups), and version control using Git, GitHub, and Bitbucket.

GCP Project

Automated Data Pipeline (GCS → Airflow (Python) → BigQuery) Healthcare Revenue Cycle Management (RCM) Data Lake – GCP (2025)

Performed complete ETL pipeline design, development, and automation activities including data extraction (APIs, Cloud Storage, Cloud SQL, Pub/Sub), data transformation (Dataflow, Dataproc, PySpark), data loading (BigQuery Data Warehouse), data orchestration (Cloud Composer / Apache Airflow), data modeling (Star & Snowflake Schema), data quality validation, metadata management, workflow scheduling and monitoring, version control (Git, GitHub), CI/CD (Docker, Jenkins, Kubernetes), IAM configuration and access control, logging and error handling, cost and performance optimization, and dashboarding and reporting (Looker Studio / Power BI).

Key Achievements:

Automated data ingestion and transformation reducing manual effort by 70%, optimized BigQuery queries improving pipeline performance by 40%, implemented CI/CD and containerization using Docker and Jenkins for faster deployment.

Education		
Graduation		June 2017 – May 2020
Bachelor of Mathematics,		
Certificates		
Udemy: GCP data engineering end to end project Healthcare Domain by Saidul Shaik (Aug 2024 -May 2025)		
Languages		
English Hindi Marathi
