CHENNAI

Highly analytical and process-oriented Power BI Developer with 4+ years of experience in developing reports and applications using Power BI. Possesses in-depth knowledge of translating business goals into technical specifications to support data-driven decision-making. Experienced in creating interactive visual reports using Power BI and other BI tools.

Experience

Power BI Developer at Perficient India Pvt Ltd

APRIL 2021- TILL

Summary of Experience:

- 4+ years of experience in Business Intelligence and Data Visualization using Power BI and SQL Server.
- Proficient in Power BI Desktop and Power BI Service for **developing, publishing, and managing reports** and dashboards.
- Skilled in connecting to various data sources using **Import, Direct Query, and Live Connection** modes.
- Expertise in data shaping and transformation using Power Query Editor, applying functions for filtering, merging, pivoting, unpivoting, and cleaning data.
- Strong knowledge of **SQL**, with hands-on experience in writing **joins, aggregations, subqueries, and window functions**.
- Designed and implemented efficient data models, including **star and snowflake schemas**, with appropriate relationships and hierarchies.
- Developed calculated tables, columns, and measures using DAX, including advanced iterator functions (e.g., **SUMX, AVERAGEX**).
- Built interactive dashboards using various visualizations such as:
 - **Line Chart, Bar Chart, Area Chart, Pie Chart, Table, Matrix**
 - **Tree Map, Waterfall Chart, Funnel Chart, Clustered & Stacked Charts**
- Applied **drill-down, drill-through**, slicers, and filters to enhance user interactivity and report navigation.
- Implemented Row-Level Security (**RLS**) to restrict data access based on user roles and ensure secure reporting.
- Published and managed reports in Power BI Service, organizing workspaces and sharing content with business users.
- Collaborated with stakeholders to define and monitor KPIs, delivering insights aligned with business objectives.
- Ensured reports are user-friendly, visually appealing, and performance-optimized for both desktop and web environments.

Education

BHARATH UNIVERSITY

JULY 2017 - MAY 2021

- Bachelor of Technology in Electronics and Communication Engineering

Skills

- Power BI Desktop
- Power Query Editor
- Power BI Service
- Power Pivot
- DAX
- SQL
- Tableau
- Advanced Excel

Project 1

Domain: Health care

Client: Boston Scientific

Environment: Power BI, Power Query Editor, SQL Server

Description:

Everything USP does is aimed at helping protect and improve the health of people around the world. USP creates public standards and related programs that help ensure the quality, safety, and benefits of medicines. USP continually works to build and reinforce a foundation that brings them closer to a world where everyone can be confident in the quality of health and healthcare.

Roles and Responsibilities:

- Responsible for gathering requirements for Power BI reports from business users and executives.
- Presented analysis to internal and external teams, explaining data from a business perspective.
- Generated reports on business performance, feature adoption, and impact assessment.
- Created, improved, monitored, and maintained interactive Power BI dashboards.
- Assisted non-technical stakeholders in querying and interpreting data from multiple sources.
- Performed data quality control (QC) and validation to ensure accuracy and consistency.

Project 2

Domain: Banking

Client :Atlantic Union Bank

Environment: Power BI, SQL Server, and Excel

Description:

As a Power BI Developer at Atlantic Union Bank, I supported analytics post-merger with Sandy Spring Bank, managing \$38B+ in assets. I developed dashboards to track credit risk, retail performance, and loan analytics. My reports visualized KPIs like asset growth, deposit trends, and branch-level performance. These insights supported real-time decision-making and post-merger integration efforts.

Roles and Responsibilities:

- Designed and developed Power BI dashboards to monitor loan portfolios, credit risk, and deposit trends across business units.
- Connected and transformed data from core banking systems, CRM, and financial databases using Power Query and DAX.
- Built executive-level reports to track KPIs including asset growth, branch-level performance, and community development impact.
- Collaborated with business teams in finance, compliance, and retail banking to define reporting needs and deliver insights.
- Optimized data models and DAX measures for performance and accuracy across large financial datasets.
- Automated monthly reporting processes for regulatory and operational metrics using scheduled data refreshes.

Project 3

Domain Name: Ecommerce

Client :Dillard's Inc

Environment: Power BI, SQL

Description:

A leading furniture retailer offering a wide range of Furniture, Appliances, Lighting, Décor and Home Goods. The purpose of the project is to build visual reports and dashboards for the Sales & Distribution division of the company. These visualizations help track the performance of sales and distribution services provided to customers.

Roles and Responsibilities:

- Extracted and processed data from sales platforms, CRM systems, inventory databases, and payment gateways.
- Designed optimized data models and developed DAX measures, calculated columns, and tables to derive actionable sales insights.
- Created interactive dashboards to visualize sales performance, customer behavior, revenue trends, and inventory analysis.
- Implemented Row-Level Security (RLS) for role-based access and ensured data accuracy and compliance.
- Enhanced report performance, managed the On-Premises Data Gateway, and scheduled automated data refreshes.

Declaration:

I hereby declare that all the above information is true to the best of my knowledge.
