SKILLS

- PowerBI, PowerApps
- Tableau, Looker Studio
- AWS Quick Sight
- Microstrategy
- SAP Business Objects
- Jira
- Oracle
- SQL Server, Lakehouse
- Snowflake, Data Bricks
- Service Now, HP Service Centre
- Celonis

CERTIFICATIONS

- Certified as Microsoft PowerBI Data Analyst
- Certified as AWS Cloud Practitioner
- Certified as Tableau Desktop Analyst
- Certified as Microstrategy Analyst
- Certified as Microstrategy Data Scientist

ACCOLADES

- Received Pat On Back Award
- Received Bravo Award

SUMMARY

- Results-oriented IT professional with **13+ years** of extensive experience in **Data Analytics, Business Intelligence (BI)** Development, Production Support, and team leadership across **Pharma, Manufacturing, Retail** and **Automobile** domains.
- Proven ability to lead high-performing teams, drive business transformation through analytics, and manage complex service transitions and operational workflows.
- Hands-on expertise in modern BI and visualization tools such as **Microsoft Power BI, Tableau, SAP BusinessObjects, MicroStrategy, Looker Studio** and **AWS Quick Sight** with a strong focus on enterprise-level dashboarding, data modeling, and performance optimization.
- Currently leading and **managing a 20-member analytics and BI team**, with hands-on experience in service delivery, stakeholder management, and end-to-end project execution.
- Key contributor to both **tactical and strategic** decision-making initiatives, developing proof-of-concepts (**POCs**) with business teams to evaluate and implement best-fit visualization tools.
- Experienced **Service Transition Manager**, coordinating cross-functional deployments for application go-lives under the SAC Program by collaborating with project teams, ATS Managers, OSM, and CSM.
- Actively involved in solutioning and proposal development for migration projects, including transitions from Tableau to Microsoft Power BI.
- Adept at evaluating and implementing modern BI platforms, ensuring scalability, performance, and business alignment

WORK EXPERIENCE

Tech Mahindra Limited | Data Analytics Lead | Sep 2021 – Till Date

- Led requirements gathering, business analysis, and **wireframe development** for reporting systems, ensuring alignment with stakeholder needs and timely delivery.
- Recruited, trained, and developed a team of full-time employees (FTEs), creating a high-performing group to manage BAU (Business-As-Usual) activities effectively.
- Built a Business Intelligence (BI) team from the ground up, overseeing recruitment, onboarding, and defining the project roadmap in collaboration with the PMO.
- Established standards and best practices for Data Governance, Process Management, and Application Lifecycle Management.
- Conducted regular status meetings with stakeholders, including Onsite Business Analytics Leads (BALs) and Delivery Leads, providing detailed progress reports.
- Authored **best practices documentation** and **estimation effort templates** for visualization tools, supporting future development and enhancement initiative
- Developed and strengthened the Visualization team through targeted training programs and workshops tailored to project needs.
- Collaborated with cross-functional stakeholders to translate business needs into functional requirements, designing and delivering insightful BI reports.
- Managed data integration from diverse sources, including data cleansing and transformation using Power Query.
- Created optimized data models ensuring high performance and data integrity, utilizing advanced DAX calculations, identifying KPIs to support analytical insights to decision-makers
- Troubleshooting performance issues and optimizing BI reports for fast rendering.

EDUCATION

- B. TECH(IT) from K.S.R COLLEGE OF TECHNOLOGY (ANNA University) IN 2005

Astrazeneca Limited | Senior Consultant | Mar 2016 – Sep 2021

Mphasis Limited | Senior Software Engineer | Sep 2010 – Mar 2016

Saksoft Limited | Consultant | Nov 2009 – Aug 2010

- Analyzed and interpreted business intelligence requirements to design scalable data models and transform raw data into actionable insights.
- Developed interactive dashboards and reports using Microsoft Power BI, aligning visualizations with defined KPIs and business objectives.
- Implemented row-level security and other robust data governance measures to safeguard sensitive information in BI reports.
- Acted as Service Manager during application Go-Lives under the SAC Program, coordinating with project teams, ATS Managers, OSM, and CSM for smooth deployment.
- Led and facilitated Weekly Project Delivery Review (PDR) meetings, presenting project status, risks, and issue resolutions to stakeholders.
- Independently managed daily Hypercare calls post-deployment, resolved critical issues, and ensured seamless transition to BAU mode.
- Played a key role in structuring BI platforms, translating stakeholder needs into sustainable architecture and reporting frameworks.
- Provided ongoing technical support, change management, and implementation oversight for enterprise BI applications.
- Worked extensively on SAP BusinessObjects, utilizing functionalities such as queries, slicing/dicing, crosstabs, filters, prompts, alerts, and advanced calculations.
- Designed and defined hierarchies for reports based on business rules; built dashboards using Query as a Web Service on SAP BW, integrating with Universe and Excel data.
- Created Xcelsius dashboards based on defined business requirements and UI design documents.
- Recognized as the best POC and awarded for excellence in project delivery and stakeholder engagement.
