Summary

Versatile and results-driven **Data Analyst & Power Platform Developer** with 4+ years of experience in designing and delivering end-to-end business intelligence and automation solutions. Proficient in **Power BI, PowerApps** (Canvas & Model-Driven), **Power Automate, Databricks, KNIME, SQL**, and **Python (Pandas, NumPy and Matplotlib)**. Skilled in **data modeling, interactive dashboard development, and low-code application design**, with a proven ability to translate complex business requirements into actionable insights. Experienced in integrating data across platforms to streamline workflows, enhance decision-making, and improve operational efficiency in enterprise environments.

Skills

BI Tools - Microsoft Power BI (Desktop, Service), PowerApps, Power Automate

Data Tools - KNIME ETL, Databricks, SQL Server

Programming

-Python (Pandas, Matplotlib and NumPy), SQL, HTML, JavaScript

Data Management Soft Skills

- SharePoint, Data Query Languages
- Teamwork, Troubleshooting, Communication

Work Experience

Microsoft Power Platform Developer || Data Analyst

Tranzita Systems – Lucknow, India | 05/2021 - Present

- Developed interactive Power BI reports and dashboards to analyze network traffic patterns, identifying bottlenecks and optimizing performance.
- Integrated Power BI with data sources to track and visualize security metrics, monitoring firewall rules and unauthorized access attempts.
- Collaborated with cross-functional teams, using Power Apps and Power BI to streamline IT processes and provide data-driven insights to improve efficiency.
- Implemented Power BI dashboards and Power Apps workflows to support cloud migration strategies and monitor hybrid environment performance.
- Optimized database performance by integrating Power BI with SQL queries, creating custom reports for indexing and query optimization analysis.

Projects

Farm to Shelf – P&G Hyderabad

- Developed Azure Data Factory pipelines to extract data from network drives, SharePoint, Blob, and On-prem SQL.
- Written PySpark scripts in Databricks and SQL procedures in Azure SQL for data transformation.
- Created an interactive Power BI dashboard to monitor inventory, production, and downtime, improving efficiency and reducing machinery downtime by 20%, saving \$20,000 monthly.

On Shelf Availability (OSA) – P&G Mumbai

- Developed dynamic Power BI dashboards using SQL Server, SharePoint, and Dataflows to monitor on shelf availability, inventory levels, and sales KPIs.
- Built custom DAX Measures and implemented Row-level security (RLS) to ensure secure, role-based access to sales data.
- Conducted in-depth root cause analysis to identify and resolve stock availability issues, improving product placement accuracy and reducing delivery gaps by 25%.

Product Management Application (Power Apps) – P&G Mumbai

- Migrated an Excel-Based Product Management workflow to a Power Apps application using SharePoint as the data source and Power Automate for multi-level approval process.
- Integrated Microsoft Teams and Outlook connectors into Power Automate for seamless communication across multiple approval teams.
- Developed automated flows to sync updated product identities with a Microsoft SQL Server database and implemented VBScript to update the LPC system from SQL.
- Created RESTful APIs using .NET, deployed them via IIS, and integrated API triggers into the Power Apps interface to extend functionality.

Global Inventory Management Application – (UK)

- Developed a PowerApps Canvas Application used across 50+ plants globally to optimize inventory levels and reduce time, effort, and costs associated with stock audits.
- Built Power Automate flows to automate daily summary emails, compile pending task notifications, and populate SharePoint lists with data extracted from SAP.
- Configured role-based permission hierarchies within both SharePoint and the PowerApps application to ensure secure access control.
- Designed a Power BI dashboard to visualize inventory turnover rates, stock levels, and stockouts, enabling data-driven decisions that improved inventory efficiency, reduced costs, and enhanced customer satisfaction.

Additional Projects

Delivered data analysis, automation, and reporting support across key projects such as Safety Evacuation, D1 Dashboard, Customer Node, Trend Dashboard, BAU Dashboard, Go Lab, India ISC, TT Dashboard, and Action Plan.

Education

B.C.A - Bachelor of Computers (2016)

Dr Bhim Rao Ambedkar University, Agra

Certifications

- **Udemy** - Data Analysis (Pandas and Python)
- **Udemy** - Microsoft SQL Server Database Administration
- **ByteCode** IT Solutions - Python
- **NIIT** - Programming in C
