SUMMARY

Motivated Full-Stack Developer with hands-on experience in web and mobile application development. Proficient in Java, SQL, and system architecture. Skilled in both frontend and backend technologies with a strong foundation in software engineering principles. Additionally experienced in Revenue Cycle Management processes. Passionate about deploying scalable solutions that meet user needs.

WORK EXPERIENCE

Process Associate – Revenue Cycle Management (RCM) Prochant

Feb 2025 - Present

- Worked in the qualification process, performing eligibility verifications to ensure patients met payer-specific criteria for Durable Medical Equipment (DME).
- Reviewed and verified medical documentation to confirm compliance with clinical requirements before proceeding to billing.
- Handled prior authorizations, coordinating with insurance providers to obtain necessary approvals at the initial stage.
- Ensured accurate documentation and maintained compliance with HIPAA regulations and internal standards.
- Facilitated smooth billing workflow by ensuring all pre-billing checks were thoroughly completed

JAVA Full Stack Developer Intern

Feb 2024 - 2025

- Developed full-stack applications integrating frontend (React, HTML/CSS) and backend (Java, Node.js, SQL).
- Contributed to API design, database schema planning, and application deployment.
- Collaborated in Agile sprints to build and optimize features across platforms

EDUCATION

Bachelor of Technology in Information Technology

Saveetha School of Engineering, Chennai

May 2020 - 2024

- Specialization in Computer and Programming

Higher Secondary Education – Computer and Mathematics

Vidya Vikas Matriculation Higher Secondary School, Thanjavur

Jun 2019 - May 2020

PROJECTS

Android Book Listing Application –

Built a native Android app with structured book listings.

Grocery Store GST Billing Application –

Created a full billing solution with GST calculation.

Food Truck Finder App –

Developed for both web and Android platforms.

Research Project – “

Intrusion Detection in Computer Network Security using Random Forest Algorithm vs Logistic Regression, SVM, and XGBoost.”

Sentiment Analysis from Google Form Responses –

Applied NLP techniques for sentiment classification.

ADDITIONAL INFORMATION

Certifications:

- Ethical Hacking Masterclass
- C++ Programming (CodSoft)
- WordPress & BigQuery (Coursera)
- Android & Web App Development
- Cambridge Linguistics

Interpersonal Skills:

- Effective Communicator
- Adaptive Problem Solver
- Proactive Relationship Builder
