

CATHERINE CHRISTY CHACKO

Present Address: Puthenveetil h, 15th mile, Vazhoor P.O, Kottayam, 686504
Phone: +91 (0) 8921970179
Email: catherinechristyc@gmail.com

PROFESSIONAL SUMMARY

Results-driven Java backend developer with 6+ years of experience building scalable microservices and enterprise APIs using Spring Boot, REST, and AWS. Strong expertise in Java, distributed systems, CI/CD, and cloud deployments.

TECHNICAL SKILLS

- | | |
|------------------------------|-----------------------------|
| ▪ Programming Languages | Java |
| ▪ Frameworks & Libraries | Spring Boot, JUnit, Mockito |
| ▪ Version Control | GitHub |
| ▪ CI/CD & DevOps | Jenkins, Spinnaker |
| ▪ IDE : | IntelliJ IDEA, Eclipse, STS |
| ▪ Build tools: | Maven |
| ▪ Cloud Platform | AWS |
| ▪ Monitoring & Observability | Splunk, Datadog |
| ▪ Deterministic Rule Engine | Drools |
| ▪ Operating System: | Windows, Linux, iOS |

TECHNICAL SUMMARY

IBS Software | Technical Lead

Project : **Insurance Configuration Service for Travel Client**
May 2024 – Present

- Developed and tested **Spring boot microservices** for a travel-based product client, focusing on **insurance rules configuration** and retrieval.
- Managed **AWS cloud deployments**, ensuring **scalability** and **high availability** of services.
- Used **Splunk** and **Datadog** for **real-time monitoring**, enabling proactive issue resolution.
- Introduced **Cucumber** for **BDD-based automation testing**, improving collaboration and test coverage.
- Utilized **Reactive WebClient** for **asynchronous, non-blocking communication** with external services, enhancing system performance and scalability.
- Ensured version control using **Git** and **GitHub**, promoting collaboration and efficient code management across the team.

Infosys Limited | Technology Analyst

Sep 2022 – May 2023

Project: Compliance Adherence and Assurance Framework

- Developed **RESTful APIs** for **compliance determination** using **Spring Boot** and advanced **Java** features.
- Improved performance of APIs using **Multithreading**.
- Led a team of three developers, ensuring high code quality with **JUnit** and **Mockito**.
- Integrated **Drools** for **deterministic AI**, automating compliance decisions.
- Managed **Docker deployments** on **Kubernetes** clusters, optimizing performance and reliability.

Bosch Global Software Technologies Pvt Ltd | Software Developer

July 2017 – Aug 2022

- Developed **ECU configuration tools** using **Core Java Concepts** and **AUTOSAR** standards.
- Ensured robust application performance through **JUnit** and **Mockito** testing.
- Automated build and deployment with **Jenkins** to streamline CI processes.

EDUCATION

2013- 2017 **Bachelor of Technology: Computer Science Engineering (CGPA: 8.02)**

Government Model Engineering College, Ernakulam, Kerala, India

2011- 2013 **Central Board of Secondary Education, India**

- Higher Secondary Level (91.4%)
- Secondary Level (95%)

PUBLICATIONS

Thesis on “A Novel Method for Automatic Device Control using Emotion Recognition” was presented at the 2017 International Conference on Intelligent Computing, Instrumentation and Control Technologies (ICICT) and was published in [ieeexplore](#), [researchgate](#) and [semanticscholar](#).
