Java Developer with 3+ years of experience

Career Objectives:

Seeking a position for challenging and rewarding post in a dynamic company where I can use my strong technical knowledge and skills for developing codes. And I want to use my technical background and expertise in developing software by using valuable resources within a growing organization.

Professional Summary:

- Having 3+ years of experience professional experience in development of various Object oriented and web-based Enterprise Applications using Java/J2EE technologies and frameworks.
- Proficient in full Software Development Life Cycle (SDLC) using **Agile and Scrum methodology**.
- Hands on experience on **Spring Boot** and **Spring Data JPA**.
- Have very good experience in working with Batch Processing using **Spring Batch**.
- Having good exposure in writing the Persistence layer using ORM tool **Hibernate and JPA**.
- Good knowledge in Distributed Technologies like **Restful Services**.
- Experience in writing Junit test cases using **Junit** and **Mockito** tool.
- Working experience of build tool **Maven**.
- Working experience on **Swagger and Postman**.
- Experience in working with **MySQL** and **MongoDB**.
- Expertise in implementing various Object-Oriented Design Patterns such as Singleton, Strategy, Factory, DAO.

Experience Profile:

- Working as **Software Developer** at **Tahr Tech**, Kozhikode, Kerala, India from March 2025 to May 2025.
- Worked as **Associate Software Engineer** at **Edgerock Software Solution Private Limited**, Hyderabad, India from January 2022 to March 2025.

Education:

- Completed **BCA** (Bachelor in Computer Application) from **DCMT**, Berhampur University, Odisha, in 2022.

Technical Profile:

Skills	Experience
Programming Language	Java
Operating Systems	Windows7,8,10
DB Languages	MySQL
Technologies/ Framework	Microservice, Spring Boot, Spring Batch, Spring Data JPA, Hibernate, Angular, Html, CSS
Version Control	GIT, Bitbucket
IDE	Eclipse, STS, IntelliJ
Logging Tool	Log4j
Build Tool	Maven

Project Detail:

Project in Tahr Tech

Client Name: AFS(Arab Financial Service)

Arab Financial Services

Project Description

Arab Financial Services (AFS), a leading digital payments platform in the MENA region, where I developed and maintained scalable backend systems using Microservices Architecture with Spring Boot. Implemented high-performance batch processing using Spring Batch for transaction settlements and reconciliation workflows. Integrated Spring Data JPA for relational data management and MongoDB for handling semi-structured transactional data. Leveraged Apache Kafka for real-time event streaming and inter-service communication, enabling decoupled, asynchronous workflows across financial modules. Ensured secure and compliant service development aligned with PCI DSS standards, delivering robust, high-throughput systems for mission-critical financial operations.

Technologies Used

Microservices Architecture, Spring Batch, Spring Boot, Spring Data JPA, MongoDB, Kafka.

Roles And Responsibilities

- Created APIs for different business functionality using Spring Boot.
- Actively involved in the migration of data pipelines involving Kafka, MongoDB, and Apache Pinot, focusing on optimizing data flow and ensuring seamless transition with minimal disruption.
- Implemented and maintained data integrations between MongoDB and Apache Pinot using Kafka as a message broker, improving real-time data accessibility and reducing query latency.

Client Name: KLM

SmartPRA (Passenger Revenue Accounting)

Project Description

SmartPRA (Passenger Revenue Accounting) is the next-gen SAAS platform of Passenger Revenue Accounting for Airlines. Developed using highly scalable distributed technology architecture, the platform is supported both on-cloud / hosted and on-premise deployment models. The platform uses Microservices architecture for scaling individual components and loose coupling. Major modules of PRA are – Sales, Flown, Accounting, Interline, Tax, Workflow and Exception Management, Dashboards and Reports.

Technologies Used

Microservices Architecture, Spring Cloud, Spring Boot, Spring Data JPA, MySQL.

Roles And Responsibilities

- Involved in design and development of Flown module using Spring Boot as Backend.
- Developed complex functions like Outward dashboard, Sales Dashboard.
- Involved in understanding file loading of Amadeus.
- Created API's for Outward Dashboard and Flown Dashboard.
- Involved in Writing Services for Ticket Query, Ticket Capture.
- Also integrated API in UI using Angular Framework.
