Kannur

Education

2014

B.Tech. in CSE from Government College of Engineering, Kannur with 72.7%

Core Competencies

Application Development

Manual Testing

Quality Assurance

Database Management

User Experience Design

Project Coordination

Stakeholder Engagement

Performance Optimization

Team Management

Certification

Data Analytics+Python- SkilloVilla-2024
DevOps Associate- Cloud Train

Profile Summary

- Extensive experience in the IT industry, specializing in designing enterprise applications tailored to client requirements.
- Successfully transitioned from a Senior Software Engineer role at Experion Technologies to a Technology Lead position at Infosys Pvt. Ltd, demonstrating adaptability and growth over the years.
- Worked in manual testing for around a year. Also worked in support projects.
- Proficient in Android development using Java and Kotlin, with hands-on experience in SQLite DB Flow, Firebase, and GitHub for robust application development
- Recognized for exceptional client interaction and commitment to project success, evidenced by on-site exposure in Miami, Florida, US, sponsored by a prestigious US-based project client.
- Acknowledged for continuous high performance with rewards including Huawei Android wear, Google Home Mini, and power bank from clients, underscoring dedication and excellence
- Led key projects such as Ulta Beauty, Onboard Cruise Ship apps showcasing expertise in application development, maintenance, and bug fixing across diverse domains (2014 - Present).
- Possess excellent interpersonal skills, adept at coordinating with cross-functional teams, and demonstrating flexibility to support clients during their working hours, ensuring seamless project execution and client satisfaction.

Career Timeline

experion
technologies

2014-
2018

Since
Nov'18

Infosys

Work Experience

Since Nov'18 | Infosys Pvt. Ltd.

Growth Path:

Nov'18- Mar'22: Technology Analyst

Since Apr'22: Technology Lead

Technology Lead

Key Result Areas:

- Implementation of robust Android applications, ensuring adherence to coding standards and best practices.
- Leading the manual testing efforts, designing comprehensive test cases and strategies to ensure the quality and reliability of software products.
- Collaborating with cross-functional teams to understand project requirements and translating them into actionable development and testing plans.
- Driving innovation and optimization initiatives, constantly seeking ways to enhance the efficiency and effectiveness of development and testing processes.
- Maintaining a proactive approach to identifying and resolving technical challenges and issues, ensuring timely delivery of high-quality solutions.
- Monitoring project progress and performance metrics, proactively addressing any deviations and implementing corrective measures as necessary.
- Establishing & maintaining effective communication channels with stakeholders, providing regular updates on project status, challenges, and achievements.
- Upholding high standards of professionalism, integrity, and accountability in all aspects of project execution and team collaboration.
- Support client on production issues and implementations through ticket resolutions and reassignments after the analysis
- Tasked with completing a project that required querying and analyzing an airline database using SQL where the primary goal was to extract useful insights from the airline-related datasets, including flight, airport, and aircraft information, by writing complex SQL queries

Dec'14- Oct'18 | Experion Technologies | Sr. Software Engineer

Growth Path:

2014- 2017- Software Engineer

2017-2018- Sr. Software Engineer

Key Result Areas:

- Initially worked on manual testing of existing legacy apps (ios, android and web), report bugs, support ticket handling and proper resolutions through reassignments.
- Conducted the design and development of complex software solutions, ensuring adherence to industry standards and architectural best practices.
- Conducted in-depth code reviews and provided constructive feedback to team members to improve code quality and maintainability.
- Collaborated with cross-functional teams to analyze requirements and architect scalable and efficient software solutions.
- Drove the adoption of emerging technologies and methodologies to enhance the performance and functionality of software products.

IT Skills

Android | Java | Kotlin | Jetpack Compose | Coroutines | Flow | SQLite | Microsoft SQL | Firebase | MS Office | Android Studio | Retrofit | Rest APIs | GitHub | JIRA | Sourcetree | Crashlytics | Data Analytics | Python Basics | Agile | JUnit | Manual Testing

Personal Details

Date of Birth: 17th January 1992

Languages Known: Hindi, Tamil, English & Malayalam

Address: Thottathil House, Irinave PO, Cherukunnu VIA, Kannur – 670301

PLEASE REFER TO THE ANNEXURE FOR PROJECT DETAILS

MAJOR PROJECTS UNDERTAKEN:

Ulta Beauty

Client: ULTA

Description: Ulta Beauty is a shopping platform for makeup, skin, haircare, perfume and other beauty products

Responsibilities: Maintenance and Feature enhancements, manual testing features, basic JUnit testing

Environment: Kotlin, Appcenter, Android, Android Studio, Java, Junit

Hello Smart

Client: smart Europe GmbH (Germany)

Description: The Hello smart app displays detailed vehicle information, enables remote access, performs pre-conditioning, calls up battery and charging details, and displays nearby charging stations with details.

Responsibilities: Maintenance, bug fixes, feature enhancements, L3 Support, manual testing features

Environment: Kotlin, Android, Android Studio

PikMyKid

Client: Sachi LLC

Description: PikMyKid is a smart dismissal solution and car line management tool for school districts, charter/ private schools, after-school programs, bus transportation, and daycare facilities. It connects schools, teachers, and parents through real-time tools to make dismissals safer and more efficient.

Responsibilities: Manual Testing, reporting bugs, Supporting Production Issues, Eclipse to Studio migration, bug fixes, UI revamp, test case writing, development, testing.

Environment: Android, Android Studio, Retrofit, Jira, Git

Onboard Apps

Client: Onboard Technical Services

Description: Cruise ship management-based enterprise applications. These apps work in intranet of the cruise ship.

- **IssuTrax Mobile:** primarily used by several departments in the ship like Plumbers, Electricians, Housekeepers etc. to track and update the issues (like Cabin Dirty) status and their priority reported in a cabin. Designed to work online/offline through sync framework
- **Inspector:** Designed to effectively and efficiently carry out virtually any kind of inspection or audit onboard the Vessels.
- **IssuTrax Create:** used to report maintenance problems and other service problems that might arise in a cruise cabin, dining places, balconies, rejuvenation areas etc.
- **IssuTrax Butler:** Used by Butlers in the Cruise for cabin guests concerns.
- **IssuTrax Chat:** Chat Application for the cruise members for instant messaging and presence.

Responsibilities: Manual testing, reporting bugs in the legacy app. Maintenance, bug fixing, UI revamps, migration to Azure mobile services SDK, test case writing, development, testing.

Environment: Android, Android Studio, Microsoft Azure mobile services SDK, Retrofit, MySQL.

Meter Reading App for TC75 device

Client: Data Capture Systems Co. LLC.

Description: This project deals with TC75 rugged device. Heavily relying on barcode scanning. As the name suggests, the app captures the meter reading, handles connection/disconnection process initiation, generates summary and bill.

Responsibilities: Integration of EMDK barcode SDK, meter read capture, disconnection module, summary module.

Environment: Android, Android Studio, TC75 device.

Adia for Business and On Demand Jobs

Client: Adia Solutions LLC.

Description: Adia for Business is a free platform to book hourly workforce on demand while Adia- On Demand Jobs is a just in time staffing app.

Responsibilities: Maintenance, feature enhancements, manual testing.

Environment: Kotlin, Appcenter, Android, Android Studio, Java.
