- Digital ecosystem
- Metadata tagging
- Content management systems
- Analytics and reporting
- Project Management

WORK HISTORY

Mar 2023 - Current
HYDERABAD, India

DIGITAL DESIGNER ASSET MGMT COORDINATOR / NORTHERN TOOL & EQUIPMENT

- Spearheaded the transformation of digital product information systems to enhance product discoverability, accuracy, and consistency across web and requesters.
- Partnered with product managers, IT, and marketing teams to align technical product data with market and customer needs.
- Led initiatives to design and implement taxonomy structures, attribute models, and data schemas to enable intuitive product navigation and search optimization.
- Utilized ServiceNow to identify user experience gaps and deliver targeted enhancements that improved customer engagement.
- Manage and maintain Informatica Product 360 (PIM) platform for centralized product data governance, ensuring accuracy, completeness, and consistency across all digital channels.
- Led end-to-end product data lifecycle management, from onboarding and enrichment to syndication across eCommerce, distributor, and partner platforms.
- Migrated legacy product data and assets from PIMcore to Informatica Product 360, improving data integrity, performance, and governance.
- Lead the end-to-end lifecycle of digital assets — from ingestion and metadata tagging to version control and distribution — ensuring brand consistency and accessibility across all channels.

- Administer and optimize DAM platforms (Widen Collective, Adobe Experience Manager, Bynder) for centralized management of product imagery, videos, CAD files, and marketing collateral.
- Collaborate with design, marketing, and product teams to establish asset governance standards, file naming conventions, and taxonomy structures that align with PIM data models.
- Drive DAM–PIM integration (Informatica Product 360, AEM) to synchronize product data and digital content for consistent omnichannel experiences.

Feb 2022 - Feb 2023
BANGALORE, India

SENIOR BUSINESS ANALYST / DYNPRO INDIA PVT LTD

- Managed and organized digital assets, ensuring easy retrieval and access for team members
- Implemented and maintained DAM systems, optimizing asset workflows and storage solutions
- Provide user training, access management, and documentation to support global teams in leveraging DAM tools efficiently and securely.
- Collaborated with cross-functional teams to ensure proper tagging and metadata for all assets
- Conducted regular audits to ensure data integrity and compliance with company standards
- Developed and provided training sessions for staff on best practices for digital asset management
- Assisted in the migration of assets from legacy systems to new DAM platforms
- Utilize analytics tools (Power BI) to monitor asset performance, usage trends, and contribution to product discoverability and customer engagement.

Jan 2015 - Oct 2021
BANGALORE, India

SENIOR REMOTE ASSET ENGINEER / DELUXE ENTERTAINMENT SERVICES INDIA PVT LTD

- Strategically organize and manage digital assets for seamless ingestion into the Digital Asset Library (DAL), collaborating effectively with agencies
- Drive the entire lifecycle of image assets, ensuring efficient ingestion, archiving, and expiration management within the DAL and PIM System
- Spearhead the implementation of DAL enhancements, focusing on user experience optimization and robust data governance
- Develop and refine engaging training materials for the PIM and DAM platforms to empower users
