PROFESSIONAL SUMMARY

- I have **5.5years** of total experience in IT Industry with **4.7 years** of relevant experience in **BI tools** like **Power BI Desktop, Power BI Service, Oracle and SQL Server**.
- Hands on experience on **Power BI Desktop** and **Power BI Service**.
- Development and worked on **Creating Reports & Dashboards**.
- Developed effective **Reports & Dashboards** and Worked on existing dashboards and done enhancements as per the Clients Requirement.
- Designed **Data Modeling** and Maintained relationships between data using different **Joins**.
- Determined business critical priorities and their requirements including financial, expenditure, revenue, sales, customer products data.
- Defined **KPI's** to gauge the company's overall long term performance.
- Writing **reports** to share knowledge gained from the complied data.
- Cleaning the data and improving the data quality by **removing duplicates, errors, or outliers**.
- Skilled in writing complex **DAX** formulas to derive meaningful insights from raw data.
- Experience in **extracting, transforming, and loading data** from diverse sources using **Power Query, SQL**, and other data **integration tools**.
- Familiarity with integrating **Power BI** with various data sources such as **Excel, SharePoint, SQL Server, and cloud platforms like Azure**.
- Experienced in creation of **Appending and Merging Queries**.
- Published and Shared **Reports** into **Power BI Service**.
- Installing & **Configuring a Gateway Connectivity** and giving Access to **On-Premises data Gateway**.
- Experienced in **deployment and Scheduling Refresh**.
- Experienced on **SQL queries** relevant to **Power BI**.

EDUCATION

- **B.Tech - Information Technology** at **Anjali Ammal Mahalingam Engineering College - 2020**

WORK EXPERIENCE

- **Sciflare Technologies Pvt Ltd, Power BI Developer**
From May 2020 - Present

TECHNICAL SKILLS

- **Power BI Desktop**
- **Power BI Service**
- **Power Query Editor**
- **Data Modeling**
- **DAX Function**
- **Data Visualization**
- **SQL**
- **Oracle**
- **Report Builder**
- **Advanced Excel**

LANGUAGE

- **English**
- **Tamil**

PROJECT #3

Client : AmericanNational Insurance Company

Domain : Insurance

Environment : Power BI, Power BI Service & SQL Server

DESCRIPTION :

Worked on developing and maintaining Power BI dashboards and reports to provide insights into key insurance metrics such as claims, premiums, and customer retention. Designed data models and implemented DAX measures to support strategic business decisions. Integrated data from SQL Server and Excel to ensure consistent and accurate reporting. Enabled secure access through Power BI Service and scheduled data refreshes for real-time analysis.

RESPONSIBILITIES :

- Responsible for gathering requirements for Power BI reports from business users and executives.
- Present the analysis to internal and external teams and Explain data from a business perspective and relevance to Key Performance Indicators (KPI). Delivering reports to Business team on timely manner.
- Effectively use Power Query and DAX for calculations. Creation of Power BI Filter like visual Level filters and page level filters. Build Pages with Slicers for Quick filters, Generated Report Level filters while handling huge volume of data. Creating different visualizations using Bars, Lines and Pies, Maps, Gantts, Bubbles, and Highlight tables and Matrix.
-

PROJECT #2

Client : Bright HealthCare

Domain : HealthCare

Environment : Power BI & SQL Server

DESCRIPTION : Developed and maintained interactive Power BI dashboards to monitor patient engagement, claims processing, and provider performance. Designed efficient data models and implemented DAX measures to deliver real-time healthcare insights. Integrated data from SQL Server, Excel, and cloud sources to support strategic analytics. Ensured HIPAA compliance through secure data access and role-based permissions. **RESPONSIBILITIES :**

- Design, develop and maintain efficient and accurate ETL pipelines.
- Interacting with design & analysis team to understand business requirement and complexity of Reports.
- Analysis and development of complex Reports, Dashboards and DAX Queries.
- Create charts and data documentation with explanations of algorithms, parameters, models and relationships.
- Understanding of the data, use filters and visualizations Analyze current ETL procedures to define and create new systems.
- Effectively use Power Query and DAX for calculations.
- Extensive experience developing real world Power BI dashboards, Working knowledge in DAX and M language.
- Define key performance indicators KPIs with specific objectives and track them regularly Analyze data and display it in reports to aid decision-making.
- Ensures data security and refresh schedules are implemented.

PROJECT #1

Client : PNC Financial Services

Domain : Finance

Environment : Power BI & Oracle

DESCRIPTION: Designed and developed Power BI dashboards to analyze key banking metrics such as loan performance, customer segmentation, and transaction trends. Integrated data from SQL Server, Excel, and cloud platforms to deliver reliable and timely insights. Utilized DAX and Power Query for data transformation and advanced analytics. Ensured secure report access through Power BI Service and implemented scheduled refreshes for real-time data visibility. **RESPONSIBILITIES :**

- Present the analysis to internal and external teams and Explain data from a business perspective and relevance to Key Performance Indicators (KPIs).
- Delivering reports to Business team on timely manner. Effectively use Power Query and DAX for calculations.
- Designed and developed complex paginated reports using SQL Server Report Builder. Ensured that reports met business requirements for data accuracy, formatting, and layout.
- Build Pages with Slicers for Quick filters, Generated Report Level filters while handling huge volume of data.
- Creating different visualizations using Bars, Lines and Pies, Maps, Gantt, Bubbles, and Highlight tables and Matrix.
- Demonstrated ability to apply best practices in visualization techniques to design meaningful and impactful dashboards/reporting solutions.
