PROFESSIONAL SUMMARY

Results-driven Java Spring Boot Developer with 6.5 years of expertise in building scalable, high-performance backend systems using Java and Spring Boot. Proficient in designing and implementing RESTful APIs, database management with both SQL and NoSQL technologies, integrating microservices architecture and optimizing application performance. Skilled in working across the full software development lifecycle—from requirement analysis to deployment—while following Agile methodologies. Strong focus on writing clean, maintainable code and delivering enterprise-grade solutions in Agile environments. Proven ability to collaborate across development, QA, and operations teams to streamline deployment and improve system reliability.

TECHNICAL SKILLS

- Languages & Frameworks: Java, Java 8, Spring, Spring Boot, SQL, Junit, Mockito, Apache Camel, MyBatis
- Tools & Technologies: Maven, Gradle, Git, Postman, Eclipse, Visual Studio, JaCoCo, Kibana, Grafana, AWS, Oracle Database, ActiveMQ, Apache Tomcat, SonarQube
- CI/CD & DevOps: Jenkins, GitHub Actions
- Agile Methodologies: Agile Scrum, Sprint Planning, Retrospective
- Soft Skills: Team Mentoring, Effective communication, Collaboration

WORK EXPERIENCE

Senior Associate Consultant

Infosys Limited | Gurugram | Feb 2023 - April 2025

- Designed and developed Spring Boot middleware application services that handled incoming requests from frontend applications, utilizing RestTemplate to invoke core backend REST APIs for data retrieval. Parsed the retrieved JSON responses, extracted relevant data and applied business logic to transform and map it into structured responses returned to UI, ensuring seamless integration and efficient data flow.
- Collaborated closely with frontend and core backend API teams to define API contracts, troubleshoot integration issues, and optimize data flow between client and server.
- Implemented unit test case and integration test cases using Junit and Mockito, increasing code coverage and software quality of multiple modules to a minimum of 85% code coverage for all the modules.
- Mentored 3+ junior developers, improving overall team output and skill levels.
- Participated in agile ceremonies, code reviews, and sprint planning to ensure timely delivery of features and bug fixes.
- Analysed and fixed vulnerabilities for multiple modules in the project using open-source tools like SonarQube.
- Checked and compared AWS logs with local system setup logs to perform root cause analysis to fix bugs.
- Monitored application performance using Grafana and Prometheus to identify any system issues.

Software Engineer

CGI Global Inc | Hyderabad | June 2021 - Feb 2023

- Migrated and developed multiple existing Spring services to Spring Boot API's application.
- Integrated Apache Camel within Spring Boot applications to build and manage routing logic between various systems using predefined Enterprise Integration Patterns (EIPs).
- Trained and provided KT's and constant technical support to new joiners and freshers.
- Hands-on experience in Swagger API for backend.
- Extensively used repositories like Git and Bitbucket.
- Analysed bugs and provided timely fixes to bugs by analysing the root cause.
- Migrated the code coverage from obsolete EMMA tool to JaCoCo code coverage.
- Integrated SonarQube into the CI/CD pipeline to perform static code analysis, identify code smells, bugs, and security vulnerabilities early in the development lifecycle.
- Implemented and optimized complex SQL queries and result mappings using XML and annotation-based configurations in MyBatis.

Associate Software Engineer

CGI Global Inc | Hyderabad | April 2019 - June 2021

- Built and maintained spring services based on client requirements.
- Maintained the code quality and fixed security vulnerabilities by reviewing SonarQube reports.
- Coded Junit and Mockito test cases across various modules in the web application from scratch as part of company initiative to do test driven development.
- Developed the backend services of the web application using Java, Spring, SQL, MyBatis.

Summer Internship

Infosys Limited | 2017

- Successfully completed two weeks extensive Infosys Campus Connect Program.

EDUCATION

CFA Institute | 2022

CFA Level - 1 Exam Qualified

Bachelor of Technology in Computer Science | University of Petroleum & Energy Studies, Dehradun | 2014 - 2018

CGPA: 2.24 / 4

Senior Secondary(BSEB) | R.A.S.N.S College, Bihar | 2014

Score: 65.4%

Secondary(ICSE) | Don Bosco Academy School Patna, Bihar | 2011

Score: 84.4%

AWARDS & ACHIEVEMENTS

- Received Bronze Award at CGI APEX AWARDS for the recognition of exceptional work.
- Cleared Chartered Financial Analyst (CFA) Level-1 May,2022 Exam.
