Projects

CodeVision – Online Course Registration Platform

- We built an online course registration platform that allows users to browse courses, register, and make payments.
- Our team developed the frontend using Angular, Bootstrap, and CSS, focusing on usability and accessibility.
- I worked on the frontend design, creating intuitive layouts, dashboard UI, and registration forms for a seamless user experience.
- We implemented Responsive Forms for course registration with proper validation and error handling.
- Collaborated to enhance UI elements and styling, ensuring a consistent and modern look across the platform.

ZenTick – E-commerce Platform for Watches

- We developed an e-commerce platform for watches with features like product listing, search, cart management, and checkout.
- Our team worked on the frontend using Angular, Bootstrap, and CSS, ensuring a responsive and visually appealing UI.
- I contributed to the frontend design, focusing on layout structure, product pages, search functionality, and cart UI for a smooth user experience.
- We designed responsive UI components to ensure a seamless shopping experience across all devices.
- Collaborated with the backend team to integrate API responses for product details and cart updates.
