Capgemini

2025 - Current

SAP Fiori / UI5 Developer

- Developed a custom SAP Fiori application for a leading automotive company to manage car parts inventory, enabling efficient tracking, updates, and streamlined operations for supply chain processes.
- Designed and implemented an SAP UI5 application for mass PO upload and management, featuring an intuitive file upload, tabular display with filters, PO deletion, and real-time S/4HANA updates. Also configured destinations and deployed the app on SAP BTP.
- Worked on developing CAPM services with entities and annotations, and integrated them into SAPUI5 applications for data binding and functional testing.
- Handled end-to-end OData service integration and supported required CDS view enhancements to meet functional needs. Developed and deployed applications across both SAP BTP (Cloud Foundry) and on-premise S/4HANA environments, ensuring consistent behavior and performance. Additionally, managed complete Fiori launchpad configurations including tiles, catalogs, groups, and target mappings aligned with business requirements for smooth user access and navigation.

Tata Consultancy Services

2018-2025

SAP Fiori / UI5 Developer

- Designed and developed SAPUI5/Fiori applications in SAP BAS (Business Application Studio), incorporating functionalities such as dynamic controls, smart controls, charts, overview pages, list reports, routing, cross-app navigation with parameters, and integration with OData services. Additionally, leveraged SAP BTP (Business Technology Platform) capabilities for deploying and managing applications, ensuring scalability and seamless integration with SAP systems.
- Handled end-to-end Fiori catalog and group setups, including tile configurations, target mappings, role alignment, and application accessibility across environments, ensuring seamless navigation and consistent user experience.
- Collaborated closely with cross-functional teams including MM, FI, ABAP, CPI, Basis, and Security to ensure smooth integrations, resolve dependencies, streamline deployments, and deliver end-to-end solutions effectively.
- I have designed and developed two major Angular-based solutions: a recruitment platform that helps enterprises match candidates to the right roles through skill-based assessments and personalized learning paths, and a financial fraud-prevention solution that safeguards customers by balancing accurate fraud detection with minimal user impact through continuous monitoring and self-learning capabilities.
- Developed and maintained SAPUI5 applications, ensuring they were scalable, robust, and user-friendly also integrated with SAP Analytics Cloud, which provided critical insights in the form of dashboard.
