PROFESSIONAL SUMMARY

Software Developer with over 2.6 years of experience in MVC, .NET Core, C#, Web API, ADO.NET, and SQL Server and front-end technologies like jQuery, JavaScript, AJAX, Bootstrap, and HTML/CSS. I have worked on building and maintaining web applications, including end-to-end coding, product enhancements, and bug fixes. Experienced in following Agile Scrum practices and working through the full software development lifecycle. Contributed to developing ERP systems tailored to real-world business needs. Skilled at collaborating with teams to deliver reliable and user-friendly solutions. Motivated to grow my expertise and take on new challenges in software development.

WORK EXPERIENCE

Software Developer

DEC 2022 - Present

AnyCode Technologies | Pune

- Developed ERP modules for inventory, sales, production, and purchasing using **MVC, .NET Core, Web API, ADO.NET, and SQL Server**
- Built dynamic, user-friendly interfaces using **jQuery, AJAX, HTML, CSS, and Bootstrap**.
- Delivered customized solutions tailored for clients in the manufacturing and wholesale sectors, using prior industry knowledge to align features with real-world operations.
- Developed and consumed **RESTful APIs** for smooth cross-module communication
- Optimized SQL queries and stored procedures for performance, reducing data retrieval time and improving system responsiveness.
- Followed **N-Tier architecture** to ensure maintainability and scalability across applications.
- Participated in Agile events like sprint planning, daily stand-ups, and code reviews
- Provided production support and post-deployment enhancements.

PROJECTS

Supply Chain Management System (SCM) – Multi-client ERP Solution

Technologies Used: C#, MVC, .NET CORE, Web API, Ado.Net, CSS, HTML and Bootstrap, jQuery, Ajax, SQL Server, N-Tier App.

Description:

SCM is a tailored ERP solution designed for the clothing manufacturing and wholesale sectors. The system manages core operations such as inventory tracking, sales and purchase processing, and production management. Developed as a multi-client product, it provides configurable modules to meet varying operational needs across different businesses.

Key Contributions:

- End to end Software development, enhancement and client support
- Followed N-Tier architecture to separate presentation, business logic, and data access layers for better scalability and maintainability.
- Implemented role-based access control (RBAC) for secure user access.
- Collaborated with the team to deliver flexible and scalable ERP modules to multiple clients in the clothing industry.
- Provided ongoing client support and maintenance, ensuring smooth deployment and addressing real-time production issues.
- Shared technical knowledge with the team to improve collaboration.

TECHNICAL SKILLS

- **Backend:** MVC, Web API, C#, .NET CORE, ADO.NET,
- **Frontend:** HTML5, CSS3, Bootstrap, JavaScript, jQuery, AJAX
- **Database:** Microsoft SQL Server, Stored Procedures, Views, Joins
- **Tools:** Visual Studio 2019/2022, SSMS, Postman, VS Code, Git, IIS
- **Methodologies:** Agile (Scrum), N-Tier Architecture
- **Others:** Microsoft Excel, PowerPoint, Word, AnyDesk, Zoom

EDUCATION

Degree: Bachelor of Engineering (B.E)

Graduated: Sep 2021

College: K.K. Wagh Institute of Engineering Education and Research, Nashik.
