IT CONSULTANT

Business Intelligence Development | Data Warehousing | Data Analyst

Innovative IT professional with 14+ years of demonstrated success in the analysis and enhancement of support systems in pharmaceutical, airline, and retail organizations. Data warehousing expert with proficiency in the creation of testing processes and reports designed to enhance planning processes and influence critical business planning. Natural leader and articulate communicator skilled at building positive relationships with peers, clients, vendors, and senior leadership. *Specialties include:*

*Test Development, Schedule, and Execution / Project Management / User Training and Support
Business and Data Analytics / Change Management / Troubleshooting and Issue Resolution / SDLC
/ Agile Scrum*

*Microsoft Power BI / Microsoft Azure / Tibco Spotfire 7.8 / QlikView 11 / OBIEE / Cognos / Tableau
Server 9 / SSRS / SAP BusinessObjects BI4.2, BI4.1, XI3.1, XIR2, 6.5, 5.1.2 / Desktop Intelligence,
Web Intelligence Rich Client, Live Office / Oracle 8i, 9i & 10g / Crystal Xcelsius 4.5 / Crystal Reports
10, 2008, 2011, 2013 / Oracle PL/SQL / MS SQL Server 2008, 2012 / Informatica 7.1 / Oracle
Discoverer 4 / R programming / Implemented MongoDB on AWS Cloud*

PROFESSIONAL EXPERIENCE

Client: Nestle Waters, Connecticut, USA

Aug 2021 – till date

Role: Senior BI Analyst / Developer

Responsibilities:

- RRBI – Ready Refresh BI – As a Power BI developer created the Customer Experience, Field Operations, Revenue Generation and the Quits & Active Customer Base Trend dashboards & set them up in a single TV monitor for the Executive Leadership team.
- Databricks validation - Compared the dimension & fact tables from on-premises SQL Server with Databricks tables.
- Adhoc requests – run multiple queries for marketing teams as the commercial business was closing down during the COVID period and the residential customers were increasing drastically.
- Residential Highrise - Power BI report was created and the customer addresses (building address & sub address) were organized and in this way new customers were enrolled.
- Campaign List Report – Provide forecast list of customers based on products purchased in the past 3 months and provide them with Bottle Hangers
- Settlement Failure – Created a Power BI report find those customers whose refund transactions failed using credit card
- Experian Consolidation – Merge multiple datasets for both Commercial & Residential customers
- Out of Stock – Created a Power BI report for to show up the stock
- NAM Report – Revamp the backend procedure into a single SQL statement for Power BI reporting
- Single Use Plastic Ban – Created a Power BI report to pull the customers and intimate them on the ban and the nearest location of availability based on the zip code.
- Refresh+ Analysis – Created a report for revenue generated by running the membership program Refresh+ (Super Hero & Hero)

- Enhanced the Ready Refresh data model/semantic layer

Environment: Microsoft Power BI, Azure Databricks, Azure SQL, SQL Server

Client: Macys, Georgia, USA

Jun 2020 – Jul 2021

Role: BI Analyst / Developer / Tech Lead

Responsibilities:

CSG – Corporate Strategic Group Dashboard – As a **Technical Lead / Developer**, converted multiple reports / dashboards into Microsoft Power BI. From the existing Tableau reports, the Teradata queries are retrieved and the table names are searched in the GCP BQ Trusted zone. If the Teradata tables are not found in GCP BQ, then request the GCP BQ Enterprise team to build the pipelines to get data into Trusted zone. Then build the Big Query views in the refined zone for the Power BI shared datasets. After the data is merged in BQ for Macys, Bloomingdale and Bluemercury, the Power BI dashboard can filter the data. As and when the data is available for the new metrics, there is another parallel track where the shared Power BI Datasets are merged and the KPI's in Power BI are also merged into single dashboard.

Environment: Microsoft Power BI, Google Cloud Platform, Big Query, Teradata, Tableau

Client: Parexel, Massachusetts, USA

Nov 2018 – May 2020

Role: Senior BI Analyst / Developer

Responsibilities:

Consolidated & migrated the Tibco Spotfire, SAP BusinessObjects, OBIEE and Tableau reporting & dashboarding into **Microsoft Power BI** dashboard & scorecards using DAX query in the Azure Analysis Services (semantic layer). Gathered Requirements, involved in analysis separately for all PRISM data sources and documented them. Knowledge on Azure Data Factory pipeline for ingesting data from source system into azure, Attunity for Change data capture, Databricks for data transformation, real time processing, machine learning, deep learning and graph processing, Alation for master data management data catalog, profiling and governance suite.

- Clinical Trial Operations Reporting – Converted multiple dashboards like the Study Startup (Spotfire), Enrollment (Spotfire), Milestones (**Spotfire**), Data Management (**Tableau** - CRFs, Queries, SDV), Human Resources (**OBIEE**) & Maintenance (Tableau – Central File Issues, Monitor & Site Visits) into Microsoft Power BI. Created views/tables in the backend (SQL) that supports the Power BI visualizations via the **Azure Analysis Services** (AAS/Tabular modeling - Semantic layer) using **DAX query** for creating calculated fields. Used custom Gantt chart visualization in Power BI, which uses **R programming** for the displaying the Milestones. Documented the CTOR reporting with Semantic Layer Design (AAS) and the visualization mapping from field section → AAS field/PBI variable → PBI Calculation (if present) → Conditional formatting → Tabular Model table name → Tabular Model column name → Table name / View name → Column type → Mapping/DAX Expression. For the filters, the filter value and the mapping from Tabular Model table name onwards as above is documented.
- PRISM Analysis – Project & Resource Insights for Strategic Management. Various data sources like ProjectView (PV Reporting), Salesforce (Einstein Analytics), SEMs (Spotfire), Oracle Financials (Hyperion / BO / Spotfire), Impact Harmony (SAP BO), Human Resources (OBIEE) and Study Optimizer have been identified and consolidated to provide a single data source for PRISM reporting phase 1. Coordinated with business & data source teams and documented the business requirements.
- ACOE – Analytics Center of Excellence. Enhanced & supported the existing reporting in SAP BusinessObjects and Tibco Spotfire. Enhanced multiple BO & Spotfire reports in Accounts Payable, Accounts Receivable, Purchasing, External Projects – Investigator Fee Aging, Pass-Thru Expense Aging, Service Fee Aging, Project Transaction dashboard, Internal Projects – Internal Project Listing, Project Labor & Expense Internal dashboard, Time Reports – Overtime Hours by day, Time Off, Payroll Sick Time, Work-Life-Integration. Support Customer Auditing (Pfizer) requests like bulk data for multiple years for updated Project Numbers.

Environment: Microsoft Power BI, Azure Analysis Services, Azure SQL Server, Tibco Spotfire, OBIEE, Oracle EBS, Tableau, SAP BusinessObjects BI4.0, Web Intelligence, Universe Designer, Crystal Reports

Client: ASSA ABLOY, Connecticut, USA

Mar 2017 – Oct 2018

Role: Senior BI Analyst / Developer

Responsibilities:

ASSA ABLOY has factory locations (around 40+) all over North/South America & Canada. The BI Team (Americas) supports all factory operational & corporate reporting. Followed Agile SDLC in gathering requirements and documenting them. Handled & coordinated multiple offshore teams for daily operations & projects based. Administrated the Reporting Servers, monitor the data loads for every location in the DB server, check report queries executed by business & educate them on how to efficiently create & run them. Migration from Cognos, SAP BO & QlikView report / dashboards into **Microsoft Power BI** dashboards / scorecards and SSRS reports.

- Accounts Payable - Developed the Vouchers Processed Dashboard, PO Aging Buckets, Awaiting Resolution Receipts, Pending External Approval & Price Errors dashboard
- Accounts Receivable - Developed the Cash Receipt dashboard
- Customer Master - Developed the Active Customer with Multiple Customer Types report
- Human Resources – Migrated Cognos Headcount Summary/ Detail & Order Entry Hours report into Power BI using allocated cost centers for row level security
- Innovation & Product Development - Developed the Keyed Orders only report
- Internal Audit - Developed the Duplicate Payments report
- Inventory - Developed the Excess & Obsolete, Usage & Data Feeds reports, Inventory database, Ticket Cost
- Manufacturing - Developed the Late Orders, Forecast by part Number, Long Lead Time, Planning Code, Work Orders & Single Line reports
- Pricing - Developed the Deadlocks, Stocking Contract, Tiers by Customer, Wholesale Accounts, Wholesale Stocking
- Purchasing - Developed the Days on Hand, Supply & Demand
- Finance - Expense by Month, HFM Balance Sheet/Income Statement, Detail P&L, Trial Balance, Standard & Simulated Cost of Sales Detail, Gross Margin, Commission Report
- Factory Floor - Shipping Report, Received into Shipping Yesterday, Produced SO Far Today, Shipped So Far Today, Parts Required, Floor reports, Lines Picked per Hour, Open Orders by Day, Shipping Room Dashboard, Daily Due by Profit Center, Expedite Dashboard

Environment: Microsoft Power BI, QlikView, Cognos, SAP BusinessObjects BI4.2, Web Intelligence, Information Design Tool, Live Office, SAP Translation Management Tool, MS SQL Server 2014, SQL Server Reporting Services, ETL, procedures, functions, views, Oracle JD Edwards EnterpriseOne,

Client: Fragomen, Massachusetts, USA

Nov 2016 – Feb 2017

Role: Report Analyst / Developer

Responsibilities:

- Drafting the migration plan and designing the layout after discussing with team
- Migration of SAP BusinessObjects reports from IBM Domino to FDBL Manage [SQL Server]
- Verifying integrity of the reports
- Re-creating reports wherever required
- Validating for any impacts over the database objects

Environment: Windows 2008 R2, SAP BusinessObjects BI4.1, Web Intelligence, Information Design Tool, IBM Domino, MS SQL Server 2012

SRINIVASAN SINGARAM

732.804.6177 • SRINI02@YAHOO.COM

Client: Biogen, Massachusetts, USA

Oct 2013 – Oct 2016

Role: Supply Chain Business Intelligence Analyst / Developer

Responsibilities:

Proficient in designing and developing Business Requirement Documents (BRD), Functional Requirement Documents (FRD), Non-Functional Requirement Documents (NFRD) and Requirement Traceability Matrix (RTM). Gathered Requirements, involved in Business Analysis and Data Analysis separately for all business divisions in Supply Chain Management and documented them into their respective Specification documents. Designed and implemented SQL queries for reports and data validation. Responsible for creating validation rules for data. Performed GAP analysis and Impact analysis. Coordinated in preparing Master Data, Test Script development / execution, Data Conversion, and user training documentation. Migrated Data from MS Excel to Oracle database. Keenly followed and coordinated QA process while promoting the reports to production environment. Involved in analyzing RCA, Problem Management, Incident Management, Configuration Management, Change Management processes. Raised RFC's to implement the change using HPSM and carefully followed the process and Quality Management in the SDLC Lifecycle.

- Clinical Drug Supply - Developed the Material Destruction and Intransit reports
- Commercial Drug Supply - Developed the Expiry and Obsolescence, Onhand Inventory, Batch Overview, Inventory Analysis and Lot Genealogy reports. Worked in SAP Live Office to create connections b/w Webi and Xcelsius Dashboards. Worked on SAP QAAWS used in mapping data directly from Universe to Xcelsius Dashboards.
- Logistics - Developed the Shipments and Clinical Distributions reports
- Manufacturing - Developed the Improved Reorder Point, Authorize to Manufacture and Control Tower reports.
- Process Optimization and Effectiveness - Developed the Lead Time Analysis Lot Genealogy report.
- Procurement and Analytics - Developed the Procurement Dashboard, QA Exceptions and Previously Rejected Lots reports in Power BI Desktop
- BO Migration from XI3.1 to BI4.1 for the PO&T business group
- Oracle EBS Financials & Supply Chain Migration from 11.5.8 to 12.2.4
 - Documented the Functional Specifications for all BO reports
 - Analyzed the Oracle table/column impact in the BO reporting
 - Documented the EBS Navigation Steps for the BO Testing team
 - Supported the Users in Integration Testing
- Report / dashboard migration from BO to OBIEE
- Tableau Site Admin – Created users, groups, sites, permission rules

Environment: Windows 7, OBIEE, SAP BusinessObjects XI3.1 & BI4.1, Desktop Intelligence, Web Intelligence Rich Client, Live Office, Crystal Reports 2011, 2013, Power BI, Tableau Server 9 - Site Admin, Qlikview 11, Oracle & PL/SQL, ETL, procedures, functions, materialized views.

Client: Celgene, New Jersey, USA

Apr 2012 – Oct 2013

Role: Sr. Business Intelligence Analyst / Developer

Responsibilities:

- Gather business requirements and convert into functional document
- Based on the requirements and Impact analysis the technical design is prepared
- QA Documentation are prepared and routed for approvals
- Support the business in Data validation
- Complex DB queries, fine tuning and testing
- Prepare QA Documents like Bi-directional Matrix, GAP analysis, checklist and artifacts

Oracle EBS - Financials

- Test migrated 30 universes and connections from Oracle EBS release 12.0.6 to 12.1.3

SRINIVASAN SINGARAM

732.804.6177 • SRINI02@YAHOO.COM

- Test migrated 200 Deski report documents & its parameters from Oracle EBS release 12.0.6 to 12.1.3

SmartSupplies PMD (Planning Manufacturing Distribution)

- Created the universe and developed the QA Batch Release Statement in BO Webi
- Developed the Sunshine Act report

eQRMS – Enterprise Quality Assurance & Regulatory Affairs Management

- Created the universe & developed 7 reports in Webi for Audit & Vendor module
- Developed 3 reports for Corrective and Preventive Action (CAPA)

Basware Invoice Processing

- Created the Accounts Payable Specialist Activity report in Basware Admin module
- Created the Past Due By Approver report in Basware Admin module

REMS – Risk Evaluation and Mitigation Strategy

- Tested migrated BO reports
- Taken full ownership and completed the FDA Annual Reporting task on time. Activities like coordinating with the DBA for DB snapshot, Managed Services for the reports and universe, Testing of the reports and handled the Change & Release Management.

Drug Safety

- Created the Clinical Trials data modeling

Environment: Windows 2008, SAP BusinessObjects XI 3.1, Desktop Intelligence, Web Intelligence Rich Client, Oracle & PL/SQL.

Client: Emirates Group IT, Dubai

Jul 2007 – Feb 2012

Employer: Computer Science Corporation (CSC)

Role: Data warehousing Consultant

Responsibilities:

Business analysis, Functional analysis, Impact analysis, technical design, documentation, data modelling, data validation, DB queries & fine tuning, QA, testing

Commercial & Planning

- Created Deski reports for AQUA, Skywards, CRM, MACS, PNR internal teams
- Migration & Testing of AQUA project from BO 6.5 to BO XIR2
- Used workflow manager to create task and used workflow monitor to monitor and analyze the loading statistics

Engineering

- Creation of Ultramain universe & Webi reports

Hotels & Resorts

- Creation of data model for Reservation BO universe, Webi reports and Dashboard using Crystal Xcelsius 4.5
- Design and development of ETL using SSIS.

dnata Travel Services (dnata biz-i)

- Consolidated & migrated huge number of **Oracle Discoverer** Financial reports into BO 6.5 Webi to have single version of truth and to decommission the OLAP tool, Oracle Discoverer
- Migration & Testing of dnata biz-i application from BO 6.5 to BO XIR2
- Dashboard using Crystal Xcelsius 4.5
- Setup of regional implementation plans of dnata biz-i application for Kingdom of Saudi Arabia, Abu Dhabi and implemented for India.
- Single handedly performed all the process involved in SDLC from requirements stage to post implementation stage with maximum productivity for dnata's MIS.
- Performed QMS activities and Release Management activities.

Development & BI-Tools

- Developed POC & Implementation of BO XI 3.1

SRINIVASAN SINGARAM

732.804.6177 • SRINI02@YAHOO.COM

- Implementation of Live office connection and Query as a Web Service
- Migrated more than 100 BO (universes, connections, reports, users, user groups) applications from BO XIR2 to BO XI 3.1 at an organization level.

Environment: Windows XP, BusinessObjects 6.5, XIR2, XI 3.1, Crystal Reports 2008, 2011, Crystal Xcelsius 4.5, Informatica 7.1, Oracle Discoverer 4, Oracle 9i, 10g and PL/SQL, MS SQL Server 2008, SSIS, ETL, procedures, functions, materialized views.

Client: Saks Fifth Avenue, BurJuman, Dubai 2006 – 2007
Employer: MMTech Software Pvt Ltd
Role: Business Intelligence Analyst
Environment: Windows 2000, BusinessObjects XIR2, SQL Server2000.

Client: Gerab National Enterprises, Jebel Ali FZ, Dubai 2006 –2007
Employer: MMTech Software Pvt Ltd
Role: Business Intelligence Analyst
Environment: Windows 2000, BusinessObjects 6.5, XIR2, Oracle 9i.

Client: British Petroleum Sharjah Ltd. 2006 –2007
Employer: MMTech Software Pvt Ltd
Role: Business Intelligence Analyst
Environment: Windows XP, BusinessObjects 5.1.2, Oracle 9i.

Client: International Foodstuff Company (IFFCO), Sharjah 2006 –2007
Employer: MMTech Software Pvt Ltd
Role: Business Intelligence Analyst
Environment: Windows 2000, BusinessObjects 6.5, SQL Server

Client: Vasan Distributors 2004 –2006
Role: Crystal Report Developer
Environment: Windows 2000, Crystal Reports 10, SQL Server 2000

Client: Indus Asuka Software Pvt. Ltd., Chennai 2003 –2004
Role: Programmer
Environment: Java, Jsp, Servlets, EJB, Internationalization, Apache Tomcat, Oracle 8i

Education

Master in Computer Applications, University of Madras, Chennai, India in 2003
Bachelor of Science in Computer Science, MADURAI KAMARAJ UNIVERSITY, Madurai, India in 2000
