Chennai

PROFILE INFO

Detail-oriented Automation Tester with 2+ years of experience in writing code-based automated test scripts without commercial tools. Skilled in Python/Java, with hands-on experience building custom frameworks. Strong grasp of SDLC/STLC and Agile methodologies. Proficient in test case design, backend/API validation, and delivering quality through continuous testing and debugging.

SKILLS

- Java
- Selenium
- Maven
- Pom
- Junit
- Data Driven
- TestNG
- Cucumber
- Jira
- STLC
- SDLC
- Reg Testing
- Postman
- Rest Assured
- Appium
- Jenkins
- Git Hub
- Agile
- Android
- ios

EDUCATION

2021	Erode Sengunthar Engineering college
2019	MCA
2019	Nandha Arts And Science College
2016	B.sc - Computer Science

EXPERIENCE

Present	Cadential Technologies Pvt Ltd
Jan 2024	<i>Project Name:</i> Learnist <i>Domain Name:</i> Education

Description:

Learnist is an interactive educational platform that provides teaching materials and learning content, organized into boards. The platform enables users to curate, share, and explore knowledge across various subjects. It includes a web-based application, a mobile app, and API services to ensure seamless learning experiences.

Roles and Responsibilities:

- Developed and maintained automation scripts using Java, Selenium, and Cucumber for web-based educational platforms.
- Automated mobile app testing on Android/iOS using Appium for consistent user experience.
- Performed API testing with Rest Assured for key services like user and course management.
- Collaborated with cross-functional teams to define test scenarios and align automation with requirements.
- Integrated test suites with CI/CD (Jenkins) for continuous testing and early bug detection.
- Logged and tracked defects in JIRA, ensuring timely resolution of critical issues.
- Enhanced BDD frameworks using Cucumber for readable, reusable, and workflow-driven test cases.

Project Name: Flywidus

Domain Name: Ticket Booking

Description:

Flywidus is a cost-effective travel platform that offers affordable flight options for budget-conscious travelers. With a user-friendly interface, it ensures a seamless flight booking experience, prioritizing convenience and reliability. By providing a wide range of flight choices, Flywidus helps users find the best travel deals efficiently.

Roles and Responsibilities:

- Create robust and reusable test scripts using Java and Selenium WebDriver to automate UI testing of the ticket booking platform.
- Design and enhance TestNG-based automation frameworks for efficient test execution, reporting, and maintenance.
- Perform automated functional, smoke, and regression testing to validate booking flows (search, seat selection, payment, cancellation, etc.).
- Log defects with clear steps in tools like JIRA and collaborate with developers to ensure timely resolution.
- Create and manage test data sets and ensure automation runs are executed in proper staging or QA environments.
- Integrate automation scripts with CI tools (e.g., Jenkins) and generate TestNG reports for daily or sprint-based test coverage.
