WORK EXPERIENCE

IMPERIUM SOFTWARE SOLUTIONS PVT. LTD 2024-NOW

KPAI (Krishna Prasad Artificial Intelligence)
A Patient Document Management System integrated with NLP to convert unstructured medical documents (doctor’s notes, reports) into structured formats.

ShiftPlanner
A Medical Staff Shift Planning application that helps healthcare facilities manage and schedule shifts efficiently.

Cubes (Radiology Order Management System)
A web-based Radiology Order Management System that enables efficient ordering, tracking, and scheduling of radiology procedures for patient care.

ImperiumAI
ImperiumAI is a ChatGPT-like AI model designed specifically for the medical domain. It provides insights, summaries, and interpretations of medical reports, test cases, and patient records using advanced NLP and AI algorithms.

Clincode
Clincode is a mediconnect platform that bridges the gap between hospitals, vendors, and healthcare organizations. It facilitates shift management for nurses and other healthcare professionals by allowing seamless scheduling and coordination between different entities

CRMC Agents
CRMC Agents is an AI-powered platform designed for healthcare organizations to develop and manage custom AI agents. These agents can process and analyze internal medical data, assisting in tasks such as patient support, medical record management, and operational decision-making

● WORK EXPERIENCE

INTONE NETWORKS PRIVATED LIMITED Jan 2022-Apr2023

● iCCM (Intone Continuous Controls Monitoring)

iCCM automates business processes to reduce losses and enhance operating effectiveness by continuously monitoring financial transactions, fraud detection, quality control, and cybersecurity compliance.
