Professional Summary:

- Over 11 years of IT experience as an ABAP/4 programmer in SAP R/3 environment with good understanding and working knowledge of Full Life Cycle Implementation.
- Worked as a Graduate Assistant from Jan'17 to Dec'18.
- Extensively worked in ABAP Workbench, SAP Reports, Dialog programming, SAP Script, Smart forms, User Exits, Enhancement points, BADI, Classical and ALV reports, Interactive reports, Data Dictionary, IDOCs, ALE, EDI, RFCs, BDCs, Workflow, Screen exits, ABAP query and data migration using LSMW.
- Experience in the development as well as enhancement of various ABAP Workflow Objects
- Strong technical knowledge in SAP OTC, MM, FI/CO, ECC 6.0, SAP R/3 ECC 6.0
- Specialized in SAP core module (FI/CO, SD, MM,) ABAP Development. Have an excellent technical and functional expertise, implementation abilities, strategic thinking, interpersonal skills and innovative while handling tough assignments and providing quality results.
- Extensive experience with Data Dictionary Objects (Tables, Search help, Domain, Data element).
- Experience on OOPS Docking Container to create more than 1 ALV Report in single screen and custom container.
- Good Knowledge of data service using CDS views, Attribute views and AMDP HANA
- Working Experience in generation of Reports (Classical, Interactive, ALV and OOP's ALV).
- Experience in working on Interfaces like ALE/IDocs (inbound and outbound), Custom IDOCs, BAPIS, RFC to send and receive data from different systems
- Experience in using different screen designing tools like Sap Scripts & Smart Forms
- Worked on Module pool programming.
- Standard program modifications: Customer exits, User Exits, BADI's, and Enhancement points.
- Strong Knowledge in Performance tuning, database tuning.
- Experience in Smart Forms, and Adobe forms
- Interacted with functional consultants for finalization of specifications and report formats.
- Experience in ABAP Debugging, performance tuning and Code Optimization of ABAP/4 Programs
- Professional experience managing business processes with SAP systems and processes
- Strong Technical Analysis skills, including an ability to analyze complex business processes demonstrate solid problem-solving skills.
- Work closely with customers, cross-functional teams, research scientists, software developers, and business teams in an Agile/Scrum work environment to drive data model implementations and algorithms into practice.
- Experience in creating Central station tickets and radar.
- Develop Detail design document.

Educational Qualification:

- Master's in Information System from UHMB, 2017
- Bachelor's in computer science from JNTU, 2009

Professional Experience :

Client : Apple Inc

June'19 - Till date

Location: Sunnyvale, CA

Role: Sr. Techno functional

- Designed and developed a dynamical class to merge the spool file and send it as single file to the partner
- Designed and developed a dynamical class technical to reformat the spool file and send it to partner.
- Developed a table to enter the configuration values of the dynamical class.
- Managing Central platforms for all secure reports - design the data flow logic through a central function module to integrate all reports in Geneva including spool reports.
- Designed and developed a dynamical class to merge the spool file and send it as single file to the partner
- Designed and developed a dynamical class technical to reformat the spool file and send it to partner.
- To post the inventory posting developed a ODATA service.
- Design and Test SAP web-dynpro application backend and UI components
- Lead and/or provide SAP application development support in assigned areas
- Develop and provide test scripts for the scenarios.
- Develop and provide test data for the application.
- Conducting unit, integration, and release testing to validate functionality
- Developing and maintaining SAP design and technical specification documents
- Supporting end-users Acceptance Testing activities.
- Day-to-day interaction with the Business user and development team.
- Interact with business user collect the requirement and create a detail design document of the requirement.
- Explaining to the developers the functionality of different components and technical guidance.
- Proven ability to work creatively and analytically in a problem-solving environment.
- Excellent analytical and Debugging Techniques in the SAP R/3 System.
- Able to manage multiple tasks and priorities and work independently.
- Create the tickets for issues and resolve the Central station tickets.
- Provide SAP Report Central Server Portal access to Business user and technical user.
- Monitor the scheduled production jobs and resolve the issues.

Module- SAP ABAP, SD, MM, Security, Portal.

Environment - ECC 7.0

Client: Anadarko Petroleum

June'18 - Jan'19

Location: Woodlands, TX

Role: Sr. ABAP Developer

Responsibilities:

- Modified a report, which displays sales performance of the business.
- Analysis of Functional Spec, preparing technical document and testing documents.

- Analysis of Product and Business Requirement and preparing Technical Requirement.
- Created the workflow to send the notification with attached bills to the customers.
- Development of the object and preparing the Unit Test Plan after completion of coding.
- Developed an ALV report of sales order data by master order by day Report displays total receipts for a particular day from vendors, till date receipts for that month and consumption to each unit today and till date.
- Preparing RICEFW list and tracking the status with other team members and assigning the work to team.
- Involved in creating Tables and Table maintenance generator.
- Implemented BAPI for creating sales order with reference to contract.
- Coordinating with functional team to understand the functional requirements end to end for complex projects within and suggesting the better ways of achieving the requirement.
- Apart from above mentioned developments and project assignments, worked on so many changes Requests / Custom Developments.

Module- SAP ABAP, SD.

Environment - ECC 7.0

Client: UMHB

Jan'17-Dec'17

Location: Texas, USA

Role: Graduate Assistant

Responsibilities:

- Worked on Spec.org software to get the performance of different OS like bare metals and Virtual OS.
- Done research on Humanitarian disaster from 2015-2017 in school library.
- Created Sales order, Delivery, Invoice.
- Created purchase requisition, Purchase order, goods receipt and invoice.
- Doing research on Latent Semantic Analysis.
- Analysis of the Python code on Latent Semantic.

Client: American Greetings (Cap Gemini)

Mar'16-Sep'16

Location: Hyderabad, INDIA

Role: Consultant

Responsibilities:

- Enhanced the Sap OTC standard tcodes.
- Performed data modeling and developed Analytical views for the transactional data, Attribute views for the master data, and the calculation views as final model in HANA Studio.
- Modified user exit MV45AFZZ for updating standard fields.
- Consumed the data from the HANA DB using ABAP ODATA services.
- Updated the IDOC program to validate the quantities against the PO and error out the IDOC if the quantities are more than GR quantities.
- Developed the workflow to send the notification with attached bills to the customers.
- Developed the workflow templates for notification to the higher-level managers approval.
- Development of the object and preparing the documents for developed objects.

Module- SAP ABAP, MM, SD.
Environment - ECC 6.0

Client: Patterson (Cap Gemini)
Location: Hyderabad, INDIA
Role: ABAP Developer

Nov'14-Feb'16

Responsibilities:

- Programming knowledge in MM, SD and FI Modules.
- Developed reports, forms for sap module like OTC.
- Developed a new Service and Sales Invoices using Adobe Form.
- Added new tab in customer master tcode (XD01/XD02/XD03).
- Developed a report, which displays sales performance and commissions earned of an employee.
- Enhanced tcode VL31N and MIGO to create new Goods receipt.
- Resolved issues in the areas of General ledger, Accounts payable, Accounts Receivable, Fixed Assets, Cost Center Accounting, Internal Orders, Profit Center Accounting.
- Enhanced ME21N to update Address.
- Developed ALV Report Using Oops ABAP CL_GUI_ALV_GRID.
- Add additional fields in FBL5N (Customer line item report) using BADIs.
- Created an Interactive Report to output details like Vendor name, address etc. in the Basic list and bank details like bank name, account number and address in the secondary list.
- Made changes in dunning form as per business requirement.
- Hands on experience in ABAP Queries, payment release program runs and IDOCS.
- Hands on experience with Integration to Customer Interfaces, Building Custom Reports, Unit Integration Testing and Cut over Activities.
- Knowledge of various SD activities such as Order Management, Pricing, delivery and transportation and billing.

Module- SAP ABAP, MM, SD, FICO.
Environment - ECC 6.0

Client: HP (KPIT Info systems)
Location: Bangalore, INDIA
Role: ABAP Developer

Oct'12- Sept'14

Responsibilities:

- Modified an Interface program which creates, changes and downloads Project definition and WBS element.
- Added few fields to Sales header table VBAK and added few fields to VA41 transaction.
- Added few fields to billing document table VBRP and added few fields to VF01 transaction and updating values through user exits.
- Developed new report, which displays batch job variants and report variants.
- Development custom report to send the IDOC from SAP using MASTER_IDOC_DISTRIBUTE.
- Added new field in custom report that displays IDOC data.
- Used BAPI function call, BAPI_SALESORDER_CREATEFROMDATA for creating Sales order in r/3 system from the external system.

- Involved in modification of SAP Scripts Invoices (RVINVOICE) according to customer needs
- Modified User exit RV60AFZZ (USEREXIT_PRICING_PREPARE_TKOMP) to indexation value based on billing date.
- Worked on Developing new segment and idoc type in the case of inbound and outbound scenarios.
- Analysis of Functional Spec and preparing Technical Requirement.
- Development of the object and preparing the documents for developed objects.
- Worked on the customer-exits in the case of standard idoc type ORDERS05.
- Created Search help and assigned to screen fields.
- Added logic new pricing condition routine according to the client requirement.
- Added logic new requirement routine according to the client requirement.
- Developed batch job report using OOPS-ALV.
- Extensively worked on Performance Tuning of reports using features such as SQL Trace and Runtime Analysis.

Module- SAP ABAP, MM, SD, Security.

Environment - ECC 6.0

Client : RNAIPL (Agnie)

Aug'12- Oct'12

Location : Chennai, INDIA

Role: ABAP Developer

Responsibilities:

- Modified an Interface program which creates Sales order, Delivery order, PGI, Billing document, Excise document and ARE1.
- Developed a report, which creates PGI, Billing document.
- Modified a report, which creates accounting entry interface file to be booked in Alcor (RIPL accounting system).
- Analysis of the requirement / specification provided by the clients, and functional team member's
- Analysis of the functional document provided by the functional team members.
- Doing Technical design as per the functional document.
- Modified a Form, which creates Tax Invoice for RIPL.
- Modified a Module pool report which creates Rebate/CT1 Assignment Screen.

Module- SAP ABAP, SD

Environment - ECC 6.0

Client: Puzzolana Fabrication (SAT InfoTech)

Jun'09 to July'12

Location: Hyderabad, INDIA

Role: ABAP Associate Consultant

Responsibilities:

- Developed an ALV OOPS report to display Costing report of the order this report displays Goods receipt value, Invoice value of the Purchase Order using Event.
- Designed a report to display Age wise Analysis of Materials and Material Groups.
- Developed an ALV report to display Material details on Selection Screen.
- Created a Table to display vendor details.
- Modified RM06ELLB report according to the client requirement.

- Designed a report to insert and delete data in Z table.
- Development of the object and preparing the Unit Test Plan after completion of coding.
- Peer reviews as part of the testing.
- Modified Sales Document report according to the client requirement.
- Developed a report to display Purchase requisition details.
- Designed a Goods Receipt Slip Form for MIGO.
- Implemented Enhancement Spot to ME2L TCode.
- Implemented Enhancement Spot for Tcode ME21N.
- Implemented Badi for Tcode MIRO.
- Designed an ALV report to display Scrap Quantity.
- Implemented BAPI for creating sales order with reference to contract.
- Modified a Form, which displays the sales summary for the existing RVORDER01.
- Worked on ALV reports, Module pool programs, Smart forms, SAP Scripts.
- Worked on Scripts like changes related to logo, footer and additional calculation on forms.
- Developed new report to track the material consumption details like quantity value of material group and cost center level, output of report was equivalent to transaction code MB5B.
- Worked with BAPI_PO_GETDETAIL to get the details of delivered quantity of each item in the PO and also worked with BAPI_PO_CHANGE to change the PO.
- Developed Report which will do auto GR in background for specific plants by using BAPI 'BAPI_GOODSMVT_CREATE'.
- Working on defects during test and support phase.
- Day to day support activities includes managing user tickets, analyzing issues, debugging, as well as program bug fixing.

Module- SAP ABAP, MM, SD

Environment - ECC 5.0
