OBJECTIVE

Java Backend Developer with 3 years of experience designing and implementing scalable microservices and RESTful APIs for banking and financial systems. Proficient in Java, Spring Boot, JPA, Hibernate, and RabbitMQ with hands-on experience in cloud-based deployment using AWS and Docker. Demonstrated expertise in building loan origination and management systems, integrating with third-party services like FinnOne and account aggregators. Adept at implementing secure and efficient workflows such as AML verification, digital eSign, eNACH mandates, and deduplication services.

TECHNICAL SKILLS

Programming Languages:	Java
Frameworks:	Spring Boot, Spring Cache, Hibernate, JPA
Databases:	MySQL, Oracle
Architecture:	Microservices
Version Control Systems:	Git, Bitbucket
Build and CI/CD Tools	Maven, Jenkins
Testing Tools	JUnit
Other Skills:	API Integration (REST/SOAP/RabbitMQ)

EXPERIENCE

Hotfoot Technology Solutions

Software Engineer

Nov 2022 – Present

Noida, Uttar Pradesh

- Developed AU-Secured Business Loan, AU-Unsecured Business Loan, and AU-Housing Loan products to offer financial assistance to organizations and individuals in India.
- Designed and implemented a microservices architecture, including an LMS Integration API, with multiple services such as customer creation, loan account creation, repayment, mandate, and initial money deposit APIs, integrated with FinnOne loan management system.
- Utilized Agile methodology and pair programming for all modules, ensuring timely delivery and high-quality code.
- Managed error handling, logging, and exceptions, ensuring smooth system operation and seamless integration with third-party services.
- Worked on APIs for seamless integration with FinnOne's loan management system, automating loan processes including customer creation, account management, and repayment handling.

PROJECTS

AU Small Finance Bank

Spring Boot, JPA, RabbitMQ, Microservices, REST API

Nov 2022 – Jan 2024

- Utilized API Integration techniques to ensure seamless communication between different systems and third-party services.
- Created detailed user stories based on business requirements, actively participated in sprint planning, and provided accurate estimations for timely and successful project delivery.

Purple Finance Bank (Housing Loan)

Spring Boot, Java 8, MySQL, RESTful APIs, Nginx

Feb 2024 – Present

- Developed and integrated REST APIs with FinnOne's loan management system, automating loan processes like customer creation, account management, and repayment handling for housing loans.
- Deployed microservices using Docker containers, enabling consistent development and production environments, and ensuring scalability and high availability.

Veritas Finance (Housing, Mortgage Loan, Vishwas Product)

Spring Boot, Java, JPA, Hibernate, RabbitMQ, AWS, Linux

Feb 2024 – Present

- Developed backend microservices for Housing Loan, Mortgage Loan, and Vishwas Product for Veritas Finance, automating core banking workflows.
- Integrated with India's Account Aggregator ecosystem to fetch and analyze customer financial data securely.
- Implemented Digital eSign flow using eMudhra APIs for paperless documentation and seamless customer onboarding.
- Developed secure AML (Anti-Money Laundering) checks with rule-based validation and audit logging.
- Integrated eNACH for recurring loan repayments via direct debit, enhancing user convenience and transaction reliability.

EDUCATION

Institute of Engineering And Technology

B.Tech in Computer Science

Aug 2017 – Jul 2021

Ayodhya, Uttar Pradesh
