Experience

Equifax Inc.

Oct 2023 – Present

Software Engineer- Java, Spring Boot, Hibernate, REST APIs, GitHub, Jenkins, MySQL

Pune, India

- Developed RESTful APIs using Spring Boot, handling CRUD operations, data validation, and exception handling.
- Designed and maintained micro-services with proper separation of concerns and scalability in mind.
- Utilised Hibernate for ORM-based data access and wrote complex queries using Criteria API.
- Enhanced code maintainability by implementing efficient branching strategies with GitHub and BitBucket and enabling smooth collaboration with 20+ developers.
- Built Integrated backend systems with frontends via JSON APIs, ensuring seamless communication and performance.
- Configured and deployed backend applications on AWS and On-Premises servers through the Jenkins.

Xoriant Solutions PVT LTD.

Sept 2021 – Sept 2023

Software Engineer- Java, Spring Boot, Hibernate, REST APIs, GitHub, Jenkins, MySQL

Pune, India

- Developed and maintained backend components for client-facing web application using java and Spring framework.
- Collaborated with cross-functional teams, including UI/UX designers, QA testers, and project managers.
- Implemented JWT-based authentication and authorization (OAUTH2) for secure API access.
- Conducted thorough code reviews and applied best practices to ensure high-quality, maintainable code.

Technical Skills

- **Backend Development:** Java, Spring Boot, Spring MVC, Hibernate, REST APIs
- **Front-End Web Development:** HTML, CSS, JavaScript, JSP
- **Database:** MySQL, PostgreSQL
- **Version Control:** Git, GitHub, BitBuket
- **Cloud:** AWS, GCP
- **Other:** Jenkins, Maven, Swagger, Splunk, Datadog, Postman, WinSCP, Linux, Bruno

Projects

Equifax Inc. | *Java, Spring Boot, Hibernate, REST APIs, GitHub, Jenkins, Maven, JDBC, MySQL*

Project Name: IDMatrix- Its is an electronic identify verification system replacing manual, time-consuming processes. Implemented features enabling 24/7 automated verification via configuration rules and integration with diverse data sources (e.g IIR for scoring, external API's for Accept/Reject responses). Managed requests from API(XML), Subscriber Web Access (SWA UI) and batch channels. Contributed to significant improvements in efficiency, security and scalability for identity verification.

Xoriant Solutions PVT LTD. | *Java, Spring Boot, Hibernate, REST APIs, GitHub, Jenkins, JDBC, MySQL*

Project Name: Xorpay- This project is responsible for generating payment instruction files in the ISO 20022 PAIN (Payment Initiation) format. This system integrates with ERP applications to automate the payment processing workflow from data extraction to file generation and bank response handling. The payment files are securely transmitted to CITI Bank, which in turn provides a structured status response indicating whether the transactions have been Accepted or Rejected. The system also includes a dashboard module for real-time monitoring of transaction statuses.

Education

Institute of Industrial and Computer Management and Research, Nigdi, Pune.

Pune, Maharashtra

Master Of Computer Application

June 2017 – June 2020
