PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with nearly 3.8 years of hands-on experience in designing, implementing, and managing cloud infrastructure on Microsoft Azure. Expertise in Terraform, Azure DevOps (Repos, Pipelines, Boards), CI/CD automation, containerization using Docker and Kubernetes, and infrastructure monitoring. Familiar with agile methodologies and capable of supporting critical deployments with a problem-solving mindset.

TECHNICAL SKILLS

- **Cloud Platforms:** Microsoft Azure
 - **Infrastructure as Code:** Terraform
 - **CI/CD Tools:** Azure DevOps (Pipelines, Repos, Boards)
 - **Version Control:** Git, GitHub, Azure Repos
 - **Containerization:** Docker, Kubernetes
 - **Monitoring Tools:** Azure Monitor, Grafana, DataDog
 - **Programming/Scripting:** PowerShell (Basics)
 - **Security Tools:** Azure Firewall, Palo Alto
 - **Operating Systems:** Windows, Linux
 - **Project/Tracking Tools:** Azure Boards, Jira
 - **Incident Management:** ServiceNow, Jira
 - **Configuration Management:** Ansible
-

CERTIFICATIONS

- **Microsoft Certified: Azure Administrator Associate**
[Credential ID: CE1463F2AD964EAB](#)
- **Terraform Associate**

PROFESSIONAL EXPERIENCE

DevOps Engineer

CloudIQ Solutions Pvt Ltd, Chennai | Sep 2021 – Present

Key Projects & Contributions:

Project #1 – Veterinary Healthcare (Azure-based Infrastructure & CI/CD)

- Developed modular Terraform scripts to provision and manage scalable Azure services: VM Scale Sets, AKS Clusters, VNets, NSGs, Load Balancers, Private DNS Zones, Storage Accounts, Azure Firewall, and Palo Alto Firewall.
 - Implemented Azure API Management (APIM) for secure and scalable API deployment with full monitoring capabilities.
 - Managed source control and branching strategies using Azure Repos, with branch policies, permissions, and pull request workflows.
 - Designed and maintained CI/CD pipelines (YAML) for .NET applications across multiple environments: Dev, QA, and Prod.
 - Deployed applications to Azure App Services, and AKS clusters, ensuring zero-downtime releases and quick rollback strategies.
 - Performed troubleshooting for build/release failures, pipeline errors, and terraform related error when provisioning resources.
 - Provisioned infrastructure including Resource Groups, VNets, Subnets, VMs, Route Tables, and Storage Accounts as per client requirements.
 - Worked on Terraform Modules, State Management, Importing the state, deployed Azure Infrastructure with Terraform Modules, Terraform cloud pipelines to run the terraform scripts to execute and setting up the various VCS provider.
 - Using Ansible to create the Palo-alto connection from Azure to On-prem, On-prem to Azure vice versa and Azure resources together, Once Implement the FCR connection verified and then informed to client,
 - Manage the Azure active directory and create new user account from azure, once user account created provided the azure resource access
-

Non-IT Experiences:**CNC Operator:**

YATI Engineering -- Coimbatore (May 2015 – July 2018)

Delivery Executive:

FEDEX Courier – October 2020 – September 2021

EDUCATION**Bachelor of Engineering**

RVS Faculty of Engineering (2011 – 2015)

Place: Chennai
