

VINAY NAIR KARATH

SENIOR DIRECTOR / DELIVERY MANAGER SPECIALIZING IN SAP
ENGAGEMENTS

<https://in.linkedin.com/in/vinay-nair-karath-89b07123>

Summary

- Vinay is a seasoned SAP professional having **~15 years of experience** across multiple roles ranging from Onsite Client Partner, Service Integration Manager, Delivery Manager, Program Manager, Transition Manager, Pre-Sales Consultant, and a Solution Architect.
- Currently based out of Bengaluru, India, he has experience working across multiple geographies including Europe (5 years), Middle East (3 years) and Southeast Asia (2 years) playing multiple roles
- Vinay has a very strong techno-functional background in SAP and has managed multiple teams across multiple skill sets. He also has expertise across multiple delivery methodologies including SCRUM, KANBAN, Waterfall and Activate. Has successfully transitioned multiple waterfall engagements into Agile/DevOps.
- Excellent client handling skills, great team player with strong communication skills, analytical reasoning and logical reasoning
- Very quick learner and can take on new challenges in new technology stacks in quick time
- Vinay was one (out of 5) **Mindtree (LTIMindtree) Legend** (top 5% talent for 8 years in a row).
- Won the **2nd Prize in the Mindtree (LTIMindtree) Ideathon** in 2018 for **Sub-Zero – IoT Solution for Cold Supply Chain Solution**

Management Skills

- Delivery Management
- Transition Management
- Service Integration
- Service Delivery Management
- Pre-Sales Consultant
- Program Management
- SAP Solution Architect

Project Experience

Delivery Manager – Multiple Accounts for Retail and Consumer Goods in North America (LTIMindtree India) June 2022 - Present

Responsibilities

- I currently manage the SAP delivery activities for multiple Retail and Consumer Goods customers across North America. These accounts are:
 - a. Medline Industries – Order To Cash Modernization program
 - b. Energizer Batteries – Migration to SAP CPI from Sterling Integrator
 - c. MSC Direct – Application Maintenance and Support + Testing Services for S/4HANA
 - d. Chobani – S/4HANA AMS Proposal
 - e. Giorgi Holdings/Canpack – SAP BODs and Data Migration Project
 - Have the complete P&L responsibilities for these accounts and have multiple Project Managers for each of these engagements reporting to me
 - Responsible for additional cross-sell opportunities in each of these accounts with a target of 30% revenue growth Y-o-Y.
-

CONFIDENTIAL

VINAY NAIR KARATH

SENIOR DIRECTOR / DELIVERY MANAGER SPECIALIZING IN SAP
ENGAGEMENTS

<https://in.linkedin.com/in/vinay-nair-karath-89b07123>

Achievements

- a. Was able to double the FTE count for Energizer to 7 FTEs and got an extension till March 2025
- b. Order pipeline ~2.5 Million USD under discussion

Pitney Bowes – S/4HANA Cloud Public Edition Implementation and Rollout Management - Implementation and Roll Out – Delivery Manager (LTIMindtree India)

Sep 2022 – May 2023

Pitney Bowes, a global shipping and mailing company, provides technology, logistics, and financial services to help clients simplify the complexities of sending parcels and mail. With an annual revenue of \$3.5 Billion across 3 divisions: SendTech, Presort Services and Global Ecommerce – they are at the forefront of simplifying the complexities of send mails and parcels worldwide. This project was implemented for the SendTech division.

Pitney Bowes wanted to migrate from their SAP ECC system to a S/4HANA Public Cloud system for the following reasons:

- a. Highly customized legacy SAP ECC landscape with large technical debt – need for simplification on both systems and processes
- b. Deviation from standards especially on process and audit compliances – need for route back to standard best practices
- c. Reduction in the Total Cost of Ownership for maintaining the landscape

Responsibilities

- Was the overall Delivery Manager for the entire program and led the ~50-member team that built the solution across the following technologies: S/4HANA Public Cloud + SAP C4C (Sales & Service) + SAP FSM + SAP IAG (SOD & Critical Access Risks) + SAP CALM system (Operations & Monitoring)
- Solution went live on 12th April 2023 on time and hyper care was completed by 31st May 2023
-
- Some of the benefits delivered to the customer were around business simplification:
 - From 94 Profit Centers to 20
 - From 1,443 cost centers to 71
 - Touchless orders – from 0% to 80%
 - 34 Service Entitlement codes reduced to 3
 - 72 Lease rates reduced to 4
 - Engineer storage location reduced from 225 to 39
 - 120 Case Closure Codes reduced to 9
 - Fully integrated solution across S/4HANA + SAP C4C + SAP FSM

Achievements

- c. This was the first of its kind S/4HANA Public Cloud implementation within LTIMindtree and the first of its kind SAP S/4HANA Public Cloud + SAP C4C + SAP FSM solution built on a 3SL within SAP
- d. Success of the UK + ROI implementation led to additional work in terms of Germany rollout – Total TCV – 2.5 Million USD
- e. This program featured in SAP Sapphire held in Orlando, USA on 16th May 2023 – YouTube link:

Husqvarna / Gardena – Germany – Pegasus DevOps Transformational Program – On Site Program Manager and Service Integration Lead (Mindtree)

March 2020 – August 2022

CONFIDENTIAL

VINAY NAIR KARATH

SENIOR DIRECTOR / DELIVERY MANAGER SPECIALIZING IN SAP
ENGAGEMENTS

<https://in.linkedin.com/in/vinay-nair-karath-89b07123>

Germany)

The Husqvarna Group is the world's largest producer of outdoor power products including chainsaws, trimmers, lawn mowers and garden tractors. It is the European leader in consumer irrigation equipment under the Gardena brand. The Group is also one of the world leaders in cutting equipment and diamond tools for the construction and stone industries. Gardena GmbH, based in Ulm, Germany, is a manufacturer of gardening tools and has been a subsidiary of the Swedish Husqvarna Group since 2007

The Pegasus program has 2 primary objectives:

1. Data Center Migration (from the then incumbent partner's data center in Niederstotzingen to the Husqvarna Data Center in Ulm)
2. Service Transition from the incumbent partner to Mindtree/LTIMindtree while moving from a traditional AM + AD model to a DevOps + Productized IT Operating model

Responsibilities

- Was a part of the 5-member core bid team from Mindtree engaged from September 2019 to March 2020 throughout the entire sales cycle till the contracts were drafted and signed-off.
 - As the Onsite Program Manager was responsible for overseeing the overall transition across both the tracks: DC Migration and DevOps transformation. Worked closely with the project manager for DC migration to ensure that all the migration was completed by July 2020 and the Transition Manager to ensure that all aspects of the transition was completed by July 2020
 - Held the following key responsibilities during transition:
 - a. Led the DevOps transformation including both process and tool integration. Worked with the DevOps coach both from Mindtree and Husqvarna to ensure that there were no gaps in the process while transitioning to a DevOps working model
 - b. Led the team that built the 2-way real-time integration between Azure DevOps and ServiceNow for all the processes and handed this over to support
 - c. Worked with the Functional Team to build a manual regression suite to ensure that post data center migration there were no issues on any of the systems – we fine tuned the test scenarios across Development, Quality and Production movement
 - d. Led the team to onboard 75 databases (including SQL and Oracle) into the CAPE platform for automating the monitoring and resolution of database issues. This was done through a shared service model team of 65 members.
 - e. Led the team that implemented Technical Monitoring (TechMon) in SAP Solution Manager to automate the monitoring and alerting of the SAP systems
 - f. Was overall responsible for obtaining the sign-offs for the completion of the transition phase of the engagement
 - Was the Service Integration lead and was responsible for integrating the services of 23 partners across 57 applications for Husqvarna. This included onboarding the partners into the new ways of working, negotiating OLAs, setting up governance meetings and ensuring downtimes etc. were coordinated across partners.
 - Was responsible for defining and implementing the Change and Release Management process including defining the maintenance and freeze windows and ensuring all activities aligned to the defined calendar
 - Was responsible for monitoring the new operating model including the various DevOps teams: Sales, Operations, Logistics, HR, FICO, and the Cross Product Team (Basis and Security)
 - Was responsible for helping Husqvarna define the new processes around SAP GRC (EAM/Firefighter Access and ARA) to ensure they are compliant with the overall governance and audit standards
 - Led the following teams during the steady state:
 - a. RPA Team – From environment setup in BluePrism to implementing ~30 BOTs from system monitoring to report generation
 - b. Test Automation Team – Was responsible for implementing SAP CBTA to automate the regression suite.
-

CONFIDENTIAL

VINAY NAIR KARATH

SENIOR DIRECTOR / DELIVERY MANAGER SPECIALIZING IN SAP
ENGAGEMENTS

<https://in.linkedin.com/in/vinay-nair-karath-89b07123>

Achievements

- f. This was one of the largest engagements in Mindtree with a TCV of ~30 Million Euros across 5 years
- g. Had ~160 direct and indirect Minds reporting into me
- h. Our team achieved a Net Promoter Score of 4.48/5 and User Satisfaction Score of 4.74/5 for the period August to December 2020
- i. Was well regarded by all the colleagues from Husqvarna for all the contributions across the program

Atotech – Germany – Application Support and Maintenance Services – On Site May 2018 – March 2020 Program Manager (Mindtree Germany)

Atotech is an international specialty chemicals and equipment company. It provides chemistry and equipment for companies that manufacture printed circuit boards, IC-substrates and semiconductors; and also provides specialty chemicals and equipment for decorative and functional surface finishing in the automotive, construction, furniture and other industries. Present in over 40 countries with 5000 employees and revenues of ~1.4 Billion USD – Atotech is one of the largest specialty chemical manufacturing companies.

The Application Maintenance and Support Services engagement included providing support services for Atotech End Users across 3 regions (Southeast Asia, Europe, and Americas). The volume was ~6000 tickets (incidents and services requests a year) spanning the following SAP Modules – SAP FICO, SAP Investment Management (IM), SAP Project Systems, SAP SD, SAP MM and WM, SAP BW, SAP PP, SAP QM, SAP ABAP, SAP EHS and SAP Security and Authorization. These skills were supported by a team of 15 SAP consultants (Core Team) including 4 onsite.

Apart from the Core Team, there was also a Flex Team consisting of 4 SAP consultants (1 SAP FICO, 2 ABAP and 1 SAP BW) to work on additional Change Requests and Projects capped at 150 CRs/year.

Responsibilities

- Was responsible for negotiating the contract with the Atotech Germany team including getting the final SOW sign-off. This process took ~2 months
- Was responsible for designing the Transition Phase (spanning 13 weeks) across multiple geographies. Travelled to Singapore to co-ordinate the knowledge transition and the eventual sign-off after successful completion of the Shadow Support
- Apart from being the overall onsite program manager, I also played the role of the ABAP onsite SPOC and handled critical issues from onsite
- Anchored the Change and Release Management processes within Atotech
- Anchored all the Governance meeting across the Operational, Tactical and Strategic meetings with CXO level staff
- Sensed additional opportunities and was responsible for pitching additional services including implementing ServiceNow worldwide and SAP C4C

Achievements

- a. Grew the account from an initial 3.8 Million USD to 6.4 Million USD within 18 months especially by adding ServiceNow implementation, SAP C4C (Implementation + Support), SAP Fiori support and additional onsite geographical coverage for USA
- b. Received an extension for another 2 years from the initial end date of 15th December 2023

LeverEdge – Unilever Distributor Management System – Retailer Self Service Sep 2017 – April 2018 USmileShop – Pilot Implementation - Subject Matter Expert (Mindtree India)

VINAY NAIR KARATH

SENIOR DIRECTOR / DELIVERY MANAGER SPECIALIZING IN SAP
ENGAGEMENTS

<https://in.linkedin.com/in/vinay-nair-karath-89b07123>

Unilever, one of the world's largest FMCG, is rolling out a distributor management system (DMS) for its distributors. 75% of their entire trade is through the Distributor channel. This platform will unify the processes for all of Unilever's distributors across all the countries (starting with Southeast Asia).

The earlier solution was salesman driven (Pre-Sales or Van Sales) and required the salesman to visit outlets for order taking. Mindtree, Vxceed and Unilever jointly designed a new solution – Retailer Self Service – so that the outlets can directly place an order with the distributor without having to rely on a salesman – both freeing up the outlet from the salesman's visit schedule as well as allowing the salesman to move higher up in the value chain.

Responsibilities

- As the Subject Matter Expert, responsibilities included conducting multiple workshops with stakeholders to details aspects of the solution including overall design, promotion management, subscription and enrollment management, pilot market study and the overall implementation plan.
- Since this was the pilot and there was a need to establish the viability of the solution, we had to rollout the solution within 6 months and Thailand was chosen as the pilot market for this.
- The new Retailer Self Service application (now called USmileShop) was fully built and tested for the pilot rollout within a record 5 months and was launched in April 2018.
- Key aspects of the solution built:
 - Sync-key based asynchronous interface for RSS orders to SAP IS Retail including the order response
 - Re-designing the promotion application logic as the promotion application and budget distribution to the outlet level for promotion application
 - New outlet enrollment solution including the OTP generation new outlet enrollment
 - Designing the System Integration Testing scenarios and validating the User Acceptance criteria to ensure that go live can be achieved on time with the key functionalities required for the pilot go-live

Achievements

- j. The pilot solution went live in 5 months and close to ~2000 outlets enrolled for the pilot rollout which became ~180,000 outlets within 3 months
- k. The RSS solution became the savior during the COVID pandemic as salesman were not allowed to go to the outlets for order taking and ~85% of the orders were through the RSS app.
- l. This application won many accolades within Unilever including a special recognition from the Unilever CIO

LeverEdge – Unilever Distributor Management System – UAE - Implementation May 2015 – Aug 2017 and Roll Out – Solution Architect/On Site Program Manager (Mindtree UAE)

Unilever, one of the world's largest FMCG, is rolling out a distributor management system (DMS) for its distributors. 75% of their entire trade is through the Distributor channel. This platform will unify the processes for all of Unilever's distributors across all the countries (starting with Southeast Asia).

In UAE, Unilever has a joint venture i.e. Al Gurg Unilever in Dubai and Thani Murshid Unilever in Abu Dhabi. Currently, the solution is being implemented in 2 Phases i.e. Phase 1 – Handy Order Solution and Phase 2 – Full Integrated Solution. The solution being developed involves integration between 2 SAP systems, integration with Mobility and landing the analytics component iQ. Solution is implemented on IS Retail and has SAP-SD, MM and FI Modules at its core.

Responsibilities

- Designed and implemented the solution in 2 phases: Phase-1 – Handy Order Solution in a record time of 2 months. 100 salesmen were on boarded into the new system. Handled key aspects such as change management, Phase 2: Integrated
-

Secondary Sales system with Mobility Frontend and SAP ISR backend system.

- Preparing the Project Plan and schedule for delivering over 45 User Stories and 1200 person days of effort across 4 Sprints.
- Played a pivotal role in the solution design and architecture of the LeverEdge Solution in both Mobility and SAP ISR. Key aspects are:
 - Designed the Mobility Frontend and SAP ISR backend real time integration. This was used for secondary sales in UAE.
 - Real time interfaces between 2 SAP systems (U2K2) for stock, O2C (order to cash) and AR (accounts receivables) related data.
 - Built robust cross system reconciliation techniques.
 - Anchored the Show and Tell sessions to show case the solution being developed to the Business.
 - Prepared and implemented key activities like Business Cutover plan and this was first time right.
- Conducted multiple workshops for the Business. These included:
 - a. Requirement Gathering Workshops
 - b. Show and Tell workshops for every sprint
 - c. Train the Trainer workshop
 - d. End User Training
 - e. Post Implementation review
- Liaised with multiple partners including Testlabs (testing), Vxceed (mobility), Capgemini (master data and regression), SAP (solution review) and Accenture (PMO) and ensured that the engagement landed successfully.
- Received very good feedback and recognition from all the stakeholders on my contribution to the program.

Achievements

- m. Pitched the fully integrated solution to the Unilever Middle East CXO audience and this resulted in a \$3.8 million incremental revenue for the engagement over 2 years
- n. Was responsible for conducting a roadshow to other Middle Eastern countries (Kuwait, Bahrain, and Oman) to showcase the capabilities of the LeverEdge solution. This resulted in a pilot workshop for Kuwait
- o. Was responsible for introducing a route planning solution including partner evaluation to Unilever in this geography including pilot rollout

LeverEdge – Distributor Management System - Unilever – Vietnam - Implementation and Roll Out – Project Lead/On-Site Coordinator (Mindtree Ltd)

June 2013 – June 2015

Unilever, one of the world's largest FMCG, is rolling out a distributor management system (DMS) for its distributors. 75% of their entire trade is through the Distributor channel. This platform will unify the processes for all of Unilever's distributors across all the countries (starting with Southeast Asia). With Vietnam, the business is extremely complex especially with respect to the Promotions applicable. This project is implemented on IS Retail and has SAP-SD, MM and FI Modules including integration with Mobility.

Responsibilities

- Building and leading a team of 42 ABAP developers. Mapping skills with the requirements and defining the ramp-up and ramp-down plan. This was the biggest ABAP development team in SAP in Mindtree.
 - Preparing the Project Plan and schedule for delivering over 75 CRs with an effort of more than 8000 person days.
 - Laying the groundwork for the deliveries:
 - Defining the package structure.
 - Defining the Transport Strategy. We implemented Solman ChaRM.
-

VINAY NAIR KARATH

SENIOR DIRECTOR / DELIVERY MANAGER SPECIALIZING IN SAP
ENGAGEMENTS

<https://in.linkedin.com/in/vinay-nair-karath-89b07123>

-
- Defining the Project and the Coding Standards.
 - Setting up the Daily Stand-up meeting to track progress.
 - Defining the Progress and Delivery Templates.
 - Defining the Delivery Methodology and the Review mechanism.
 - Reviewing the Functional Specifications and ensuring enough details were present to commence development.
 - Designing and Implementing the Promotions module. This was an extremely large and customized module with ~54 Database tables and 80+ screens. Total count of objects built was ~2400 objects for this module alone.
 - Monitored and controlled the delivery of all the 75 CRs.
 - Developed objects like VOFM routines, BTE's for FB72 validations, Article Gate Control, enhancements in WSOA1 etc.
 - Maintained trackers like Transport Request Tracker, RICEFW Tracker and Quality Audit Tracker in order to facilitate delivery.
 - Was the on-site coordinator during SIT1, SIT2, UAT and Go-Live. Spent more than 4 months Onsite in Vietnam.
 - Coordinated cut-over for technical objects during Go-Live.

**GTRC SPARK SAP Implementation – Module Lead/On-Site
Coordinator/Developer (MindTree Ltd)**

**November 2012 – June
2013**

Gulf Trading and Refrigerating Company (GTRC), established in the early 1950s, is a major FMCG distributor in Kuwait and a wholly-owned subsidiary of Alghanim Industries. Over the years, GTRC has built itself into a well-established organization, handling products in food, hygiene, personal care, lighting and other categories. GTRC proudly represents various blue chip multi-national companies with more than 100 brands in its portfolio including Mars, Kraft, Colgate, Phillips etc. This implementation involved implementing the following modules: SAP FICO / MM / SD (on IS Retail), SAP BIW 7.0 and SAP SCM 7.0.

Responsibilities

- Defining and monitoring the coding and documentation standards.
- Reviewing the Functional Specifications and giving development sign-off.
- Was the sole developer in the SAP APO modules and did developments like Stock Copy Report, Planned Order Upload and Extension of Product to Vendor Location developments.
- Developed enhancements to the standard reports like FBL5N, MB52 and MB5B. Enhancements included adding extra custom columns to these reports.
- Developed Adobe forms for Account Statement (F.64) and Payment Advice (F110).
- Configured the IDOC settings between the SAP ECC 6.0 systems to the SAP EWM system.
- Mentored junior team members and helped them in completing their developments.
- Wrote the function module-based extractors (with Delta) for SAP BIW and also wrote the routines (Start and End) in the Transformations
- Maintained trackers like Transport Request Tracker, RICEFW Tracker and Quality Audit Tracker in order to facilitate delivery.
- Considerable expertise in preparing and maintaining delivery templates like the RICEFW tracker, document/code review tracker etc.
- Was the on-site coordinator in Kuwait for 1.5 months during go-live and HyperCare support.

**Alghanim Engineering HalaSAP Implementation – Team Lead/On-Site
Coordinator/Developer (MindTree Ltd)**

**July 2011 - October
2012**

CONFIDENTIAL

VINAY NAIR KARATH

SENIOR DIRECTOR / DELIVERY MANAGER SPECIALIZING IN SAP
ENGAGEMENTS

<https://in.linkedin.com/in/vinay-nair-karath-89b07123>

Alghanim Industries is a very reputed conglomerate in Kuwait. This particular project involved implementing SAP for their Engineering Division. The modules implemented include SD, MM, PS, PP, PM, CS, FICO, HR and CRM.

Responsibilities

- Distributing HR master from the Corporate System using IDOCs (message type HRMD_A). Implementing outbound BADI at the sender to map the data from the sender to the receiver.
- Enhancing standard screens with custom fields for PO, RFQ and VTOXN (MM Delivery).
- Posting the Payroll results from the corporate system to the Engineering system.
- Developing reports like the shipment tracking report (tracking a document from PR till GR), physical inventory count report, cost saving report and weekly revenue recognition report.
- Developed upload programs to upload Quotations, Sales Order, Contracts, Purchase Orders and Service Orders using BAPIs.
- Developed forms (Adobe and Smartforms) for RFQ, PO, Service Orders, Production Orders and Notifications.
- Worked extensively on BADIs, user-exits, customer exits, implicit and explicit enhancements.
- Developed a custom module for STS (Stock to Service) process. It involved creating 9 custom transactions and 3 forms.
- Spent 4 months on-site (in Kuwait) as the on-site coordinator.
- Working for the past 5 months as the technical lead (leading a team of 4 developers).
- Considerable expertise in preparing and maintaining delivery templates like the RICEFW tracker, document/code review tracker etc.

Michigan State University – SAP HCM ABAP Consultant (J235 Software India Pvt Ltd)

June -2010 to June -2011

Michigan State University is implementing SAP HCM. Some of these modules are benefits (COBRA), payroll, LSO (learning solutions), CATS (time interface) and recruitment.

Responsibilities

- Developing custom infotypes (PA/PD).
- Developing custom reports and interfaces using BAPIs.
- Enhancing the standard Cost distribution Reports/Payroll Reports/CATS interfaces.
- Worked extensively on Payroll, Time, Benefits and LSO objects.
- Developing objects using Abode Forms, Workflows, enhancements and interactive forms using design time.
- Prepare Technical specifications for FS provided.
- Handling change requests and fixing defects.
- Direct interaction with the client and front-office in order to explain the development and then testing and preparation of unit test cases.
- Helping the team in meeting their deadlines for technical deliverables.

SagemComm Pvt Ltd – SAP CRM ABAP Consultant (Capgemini Consulting India Pvt Ltd)

January -2010 to May-2010

Sagem are currently using SAP CRM module for all the customer interfaces (like identifying opportunities to creating of billing (usage or cost based). They wanted to enhance some of the existing interfaces to incorporate some customizations as well as replicate some of the R/3 processes in SAP CRM.

CONFIDENTIAL

VINAY NAIR KARATH

SENIOR DIRECTOR / DELIVERY MANAGER SPECIALIZING IN SAP
ENGAGEMENTS

<https://in.linkedin.com/in/vinay-nair-karath-89b07123>

Responsibilities

- Involved in enhancing existing CRM User Interface components using tools like AET (Application Enhancement Tool), EEWB (Easy Enhancement Workbench). Other developments included using IDOCs with LSMW in order to migrate the data from the legacy system.
- Creation of tasks and events on release of items for billing.
- Creation of interface from creating Sales order document triggered from R/3 end and mapped through SAP XI using ABAP Proxy.

Airbus (Convergence Project) - BW ABAP Consultant

October-2009 To December- 2009

(Capgemini Consulting India Pvt Ltd)

Airbus, a world leader in aviation, has various installations (including offices and factories) across Europe and relies on a wide network of systems (across various platforms) to integrate all these operations. All of the warehousing technology currently being used by Airbus either needs to be upgraded (to SAP BIW 7.0) or implemented so that all the systems run on the same platform. Convergence project aims to achieve this in a phased manner across all locations.

Responsibilities

- Responsibilities included researching and developing a tool that automates the comparison of info-objects across various SAP systems (existing production (old version SAP BIW 3.5)/ current development/ quality systems). This tool generated an output file (legal document) which ensured that the properties of the new development matched with the old versions, and once this was ascertained, each info-object was signed off as quality compliant. This tool was demonstrated to the clients (Airbus) and is estimated to have saved up to 40% of their testing/quality review time by automating the comparison of such info objects.

Essar Oil (with SAP GDC) – ABAP Consultant /Quality Lead

July-2009 To August-2009

(Capgemini Consulting India Pvt Ltd)

Essar Oil has implemented SAP 4.6C (Oil and Gas module) for running its daily operations. Since SAP is going to stop support for the older versions of the product from 2011, they had to upgrade their existing systems to SAP ECC 6.0 (Unicode compatible).

Responsibilities

- Up gradation process was executed from SAP GDC premises and responsibilities included SPAU and SPDD activities. Then we had to retrofit all the objects (from reports to SOBJ objects).
 - Responsibilities as the Quality lead involved reviewing all the objects before delivery and maintaining the delivery tracker, quality/review tracker as well as preparing the delivery guidelines.
 - Part of the support team and the client coordinator
-

<https://in.linkedin.com/in/vinay-nair-karath-89b07123>

Scavolini – ABAP Consultant

March-2009 To July-2009

(Capgemini Consulting India Pvt Ltd)

Scavolini is one of Italy's finest kitchen makers. They wanted to upgrade their computer systems from SAP 4.6C to SAP ECC 6.0 to leverage the additional functionalities provided by the new system.

Responsibilities

- Retrofitting of custom objects. Tasks included replacement of obsolete function modules and statements ensuring that the functionality remains the same. Checking for syntax compliance in the new system and also updating obsolete language constructs.
- Other tasks included peer code review and ensuring all delivered objects met the specified quality standards.
- Had to fix bugs and handle change requests during the support phase.
- Preparation of unit test cases and change logs for all the objects
- Maintaining necessary logs like issue log and review log and updating the same in Source Forge.

LVMH (Louis Vuitton Moet Hennessy) – ABAP Consultant

January-2009 To February-2009

(Capgemini Consulting India Pvt Ltd)

LVMH is the world's leading fashion and apparel company and is one of the world's most reputed brands. They decided to migrate all their existing objects from SAP 4.6C to SAP ECC 6.0 to leverage the additional functionalities provided by the new system.

Responsibilities

- Retrofitting of custom objects. Tasks included replacement of obsolete function modules and statements ensuring that the functionality remains the same. Checking for syntax compliance in the new system and also updating obsolete language constructs.
- Other tasks included peer code review and ensuring all delivered objects met the specified quality standards.
- Preparation of unit test cases and change logs for all the objects.
- Maintaining necessary logs like issue log and review log and updating the same in Source Forge.

Cadbury (One Europe Project) - ABAP Consultant

July-2008 To January-2009

(Capgemini Consulting India Pvt Ltd)

Cadbury is one of the world's leading confectioners and has some of the world's most famous products in its inventory. They have their facilities all over Europe and they wanted to integrate all their data systems into one central location based in Switzerland for easier and faster access.

Responsibilities

- Responsibilities included migrating data from legacy systems using Legacy System Migration Workbench and BAPIs in Reports.
- Worked on interfaces that involved downloading and uploading files into application and presentation servers.
- Used batch data communication methods like call transaction and session method to migrate data and display the read data using ALV reports.
- Additional responsibilities included preparation Technical specifications for all the objects and maintaining trackers.
- Resolving and providing solutions to production issues.
