

MANEPALLI BHUVANA SATYA SAI GURUDEV

Integration Developer (Dell Boomi)

Email: manepallibhuvan768@gmail.com | Phone: +91 9110588158 | Location: India

EXECUTIVE SUMMARY

- Around 5 years of experience specializing in Dell Boomi middleware technology.
- Expertise in end-to-end integration architecture and scalable enterprise solutions.
- Hands-on experience managing Atom Clouds, Molecules, and Local Atoms.
- Integrated NetSuite, BigQuery, SAP, Salesforce, REST and SOAP Web Services.
- Proficient in Groovy and JavaScript for advanced business logic.
- Strong in performance tuning, batching, streaming, and high-volume processing.
- Experienced in automated error handling, logging, and monitoring frameworks.
- Involved in complete SDLC including requirement gathering, UAT, deployment, and support.

TECHNICAL SKILLS

- Integration Platform: Dell Boomi (Professional Developer Certified)
- Connectors: NetSuite, Google BigQuery, SFTP, HTTP Client, REST/SOAP APIs, SAP, Salesforce
- Scripting: Groovy, JavaScript
- Data Formats: XML, JSON, Flat File, EDI, SQL, JDBC
- Core Concepts: API Management, Atom Management, Performance Optimization, Batching & Streaming

PROFESSIONAL EXPERIENCE

ACCENTURE | Integration Developer | August 2021 – Present

- Lead developer for high-priority integration projects between cloud and on-premise systems.
- Designed scalable enterprise integration architecture using Dell Boomi.
- Developed custom dashboards for real-time tracking and monitoring.
- Automated workflows using Groovy scripting to reduce manual intervention.

PROJECT 1: Enterprise Data Warehouse Integration

Client: ABRAMS BOOKS

Role: Integration Developer / Lead Boomi Developer

Environment: Dell Boomi, NetSuite, Google BigQuery

- Architected integration between NetSuite and BigQuery for financial analytics automation.
- Managed high-volume data extraction ensuring 100% data integrity.
- Optimized BigQuery schema mappings for large-scale synchronization.
- Implemented proactive monitoring to resolve bottlenecks.

PROJECT 2: Secure File Automation Workflow

Client: AMAZON

Role: Integration Developer

Environment: Dell Boomi, Mail (IMAP), SFTP, Custom Java (JAR), JavaScript, XML, xlsx

- Developed a high-concurrency automated workflow to process over 1000+ files daily retrieved from Mail (IMAP) and transferred to SFTP.
- Engineered a custom solution to handle xlsx (Excel) files by integrating External JAR files (Apache POI) into the Boomi library.
- Developed a custom Data Process shape to read, parse, and convert complex xlsx data into flat-file/XML format.
- Engineered Dynamic Document Routing logic based on file extensions and naming conventions.
- Implemented Flow Control (Parallel Processing) to manage high-traffic loads and prevent Atom memory overhead.
- Established secure SFTP transmission with automated retry and failure recovery.
- Built archival mechanism for audit and compliance tracking.
- Performed production stabilization and heap memory optimization for JAR-based processing.
