

ARUNPRAKASH SUDARSANAM

Business Data Analyst | Power BI | SQL | Python | Healthcare, Supply Chain

+919600025780

arunsudarsanam92@gmail.com

PROFESSIONAL SUMMARY

- Results-driven professional with 6 years of experience in Data / Business analyst roles spanning supply chain, Healthcare process optimization, data analysis, and ERP-based functional consulting.
- Skilled BI Developer with a strong track record of analyzing large data sets and implementing strategic solutions using Power BI and SQL with extensive experience in design, development and Agile methodologies.
- Experience in Power BI Reports using different DAX queries, visuals, filters, and configuring Dashboards with drill-down Capabilities and performance tuning with DAX Studio and creating appending and merging queries.
- Experienced in deployment, scheduling refreshes, and using Quick Measure for filters, time intelligence, and totals.
- Proficient in Advanced SQL queries relevant to Data Analytics.

SKILLS

- **Technical Skills**
 - **Power BI** : Power Query editor - Removing Nulls, Filtering rows, Renaming columns, Splitting columns, Merging queries, Data Modeling - Fact tables, Dimension tables, Relationships. DAX - Sum, count, If, switch, YTD, MTD, LY, Calculate +Filter, Measures, Visualizations - Bar charts, Pie, Donut, Waterfall , cards, slicer, Drill down, Conditional formatting, Row level security.
 - **SQL**: Hands on experience over Query language using MYSQL and ORACLE.
 - **Power Automate**: Worked on Data connectors, Triggers, Actions and Logic based workflows.
 - **Python Basics**: Connection using MY SQL, Connection using CSV/Excel and using basic Python codes using pandas , numpy , sqlalchemy .
 - **Data Engineering**: Familiarity with building and managing data pipelines, transformations, and scheduling workflows.
 - **Azure** : Explored end-to-end data flow from source systems to Azure Blob → ADF pipelines → SQL Database → Power BI dashboards.
- **Competencies**
 - Data analysis, Stakeholder management, Business intelligence, Requirement gathering, Data modelling, Visualizations, Data mining.
- **Soft Skills**
 - Team management, Client communications, Strategic planning, Analytical thinking.

EDUCATION

MBA: Operations and Marketing,2017 SRM University - Chennai

CERTIFICATION

- IIBA Certified Business Analyst
- Data Analysis for SQL and Power BI
- SAP MM

WORK EXPERIENCE

Senior Business Analyst / Data Analyst/ Power BI Developer

Codeboard Technology - Chennai

03/2024- 05/2025

Project Name - Dubai Carbon Calculator

- Gathered and translated business requirements into SQL queries, data models, and Power BI dashboards, enabling cross-departmental decision-making.
- Developed and optimized SQL-based pipelines and views to power dynamic reports, ensuring data accuracy, completeness, and consistency.
- Created BRDs, user stories, and functional specifications for analytics initiatives, aligning deliverables with business KPIs and operational metrics.
- Built interactive Power BI dashboards with DAX, calculated columns, advanced visuals, and Row-Level Security (RLS) to provide secure, role-based insights.
- Led a low-code project to calculate carbon emissions for Dubai hotels by automating data inputs, applying SQL-driven calculations, and visualizing results in Power BI for ESG compliance.
- Facilitated UAT, sprint planning, and stakeholder reviews, achieving a 30% faster report delivery cycle and reducing manual reporting by 40%.

Business Analyst / Data Analyst/ / Power BI Developer

Inlogic Technologies - Chennai

08/2023- 02/2024

Project Name - MMH360 NZ Healthcare Patient And Provider Portal

- Demonstrated expertise in data analysis, process improvement, and successful implementation of Power BI and SQL-based projects.
- Managed the full lifecycle of data analysis projects, from requirements gathering and SQL data modeling to Power BI report design and agile sprint releases.
- Created comprehensive data documentation (data dictionaries, report specifications, SQL logic) and managed project tasks within Azure DevOps.
- Drove process improvements by optimizing data with SQL and monitoring performance through Power BI, resulting in streamlined operations and cost savings.

System Analyst/ / Power BI Developer - FirstSource Solutions - Chennai

04/2023- 08/2023

Project Name - US Health Care Patient Portal

- Translated business requirements into actionable Power BI dashboards and robust SQL data solutions, collaborating with stakeholders.
- Responsible for understanding customer business needs (BRD) and converting them into technical documentation for data solutions.
- Assisted in the full lifecycle of data analysis projects, including requirements gathering, SQL data modeling, Power BI report design, and supporting UAT testing with operations teams.
- Contributed to process improvements through data optimization with SQL and performance monitoring via Power BI, and supported communication regarding system changes.

Team Lead - Warehouse Structuring / Data Analyst/ / Power BI Developer

01/2022- 04/2023

TATA 1MG - Bangalore/ Chennai

Project Name - Healthcare Management

- Collaborated with Procurement and Inventory teams to configure ERP for planning and automated reorder levels, enhancing operational efficiency.
- Managed SKU master data, warehouse workflows, and real-time stock tracking to ensure accurate inventory visibility and reduce discrepancies.
- Developed and optimized SQL queries to extract and validate data from ERP systems, supporting timely and data-driven decision-making.
- Created interactive Power BI dashboards to visualize inventory trends, SKU performance, and KPIs for stakeholders.
- Designed detailed process flows using MS Visio and Lucidchart to support ERP and analytics implementation.

Senior Executive Inventory Manager / Data Analyst/ / Power BI Developer

08/2019- 01/2021

Flipkart - Bangalore/ Chennai

Project Name - Alphasite (Panasonic, IFB, Onida)

- Gathered supply chain data requirements for ERP integration (customer orders, SKU inventory); utilized SQL, Power Query, and Power BI for data insights and reporting.
- Performed in-depth analysis of purchasing patterns and SKU performance using SQL queries and Power BI analytics, driving data-driven inventory optimization and demand forecasting, including DAX data modeling for complex calculations and implementing Row-Level Security (RLS) to restrict supply chain data by user role.
- Designed comprehensive process and system flows using Microsoft Visio (Activity, Swimlane, ER Diagrams); authored and maintained BRD, FRD, SRS, and RTM documents to ensure full requirement traceability.
- Led data-driven streamlined workflows, achieving measurable improvements including a 25% reduction in process delays, 15% improvement in SLA adherence, and a 30% increase in put-away productivity using visualizations.

Operations Analyst / Data Analyst

08/2017- 05/2019

Ninjacart

Project Name - Vegetable E-Commerce Management

- Collaborated with senior business analysts to prepare key supply chain reports and functional documentation, leveraging SQL for data extraction and Power BI for visualization to support ERP enhancements.
- Played a key role in data-driven process reconfiguration for new ERP module implementation, significantly improving warehouse efficiency and tracking outcomes via Power BI metrics.
- Designed conceptual wireframes for data visualization and process prototypes to communicate business needs and ERP data flow behavior, overseeing end-to-end supply chain operations from an analytical perspective.
- Used Looker to build self-service dashboards for vendor, warehouse, and delivery metrics by integrating data from Excel, SQL, and warehouse logs.
- Created reusable LookML models to define KPIs like vendor fill rate, spoilage %, and route delays for real-time decision-making.
