Summary

- Cooperative and resourceful technical support engineer with implementation and testing experience as well as 6+ years managing multi-vendor IP and VoIP networks, including configuration, automation, and various network management systems.
- Currently seeking network, customer and technical support roles with growth opportunities in emerging technologies such as virtualization, cloud computing and software defined networking.

Commented [A1]:

Technical skills

- Platforms: Cisco ASR 9K, ESR 10K, GSR 12K, 2-; Juniper 320, T640 MX960; Tellabs 8860; Genband 9K, 15K; ATM;; TDM and Frame Relay routers/switches; VoIP (Nortel, Sonus, Lucent, Ericsson, Alcatel); Cisco Unified Call Manager, Cisco Unity Unified Messaging; Voicemail (ZT SC3100, Series6, Converse, IBM)
- LAN, MAN, WAN infrastructures
- Protocols: TCP/IP, DNS, NTP, FTP, ICMP; Routing: OSPF, IS-IS, EIGRP, BGP, MPLS
- Basic Red Hat Linux knowledge/experience
- Tools: Alarm, testing, ticket, outage and maintenance management systems, circuit, physical and logical inventory databases, Splunk, Convergence and Microsoft Office 2010

Experience

Network Engineer III - Verizon | Global IP NMC | 9/2016 – 12/2017 | Cary, NC

- Vigorously assess, plan, and escalate the repair or restoration of customer and core trunks and virtual/physical network devices (Cisco, Juniper, Tellabs) on multiple global private/public IP networks to meet or exceed stringent standards (SLA) using best policies and procedures.
- Troubleshoot end-to-end layer 2/3 issues (IPv4, ARP, RIP, NAT, and VLAN); readily communicate and collaborate with peers, internal teams and vendors to restore/resolve critical customer affecting software, hardware and maintenance events in a diverse, fast-paced 24X7X365 environment.

Network Engineer III - Verizon | Voice/Data NMC | 5/2012 – 9/2016 | Cary, NC

- Directed and expedited voice and data network repairs and maintenance for the Verizon global VoIP switch network, internal data network, Verizon management network and multiple voicemail systems. Vendors: Nortel, Sonus, and Lucent switches; Cisco and Juniper routers
- Analyzed and developed enhancements for the presentation of network alarms and ticket field population during the rapid migration of 5 voicemail technologies.

Affiliate Engineer - Network Ops – Verizon | Managed Services | 3/2011 – 5/2012 | Cary, NC

- Deftly prioritized mission critical network and telephony services; customer catalyst that coordinated peers, management, internal groups and vendors to resolve 93% of critical customer cases in a 5 day or less MTTR. Vendors: Siemens, Avaya, and Nortel
- Updated tickets and reports with tracking and reason for outage (RFO) information to establish metrics for procedures, repairs, and billing.

Network Systems Analyst (Intern) - BB&T | Tiger Team | 8/2010 – 3/2011 | Wilson, NC

- Coordinated with engineering teams to assess and test LAN/WAN network and voice configuration issues to support field operations teams during the conversion of 1800+ branches from Nortel to Cisco (routers, switches and VoIP) in less than a year.
- Configured and tested Ethernet and serial interfaces including HDLC, PPP, Frame Relay, T1, and ADSL circuits as well as FX0/FXS voice-ports and dial-peers for ISDN, DID, and POTS circuits.
- QA/QC checks for VOIP phone configuration in Cisco Unified Call Manager and voicemail settings in Cisco Unity

WiMAX/RF Field Technician - Airband Communications | 2/2008 – 1/2010 | Raleigh, NC

- Performed layer 1-3 LAN/WAN network troubleshooting and analysis for Southeast Operations.
- Conducted site surveys to determine installation and line-of-sight issues and spectrum analysis to determine saturation and interference issues.
- Implemented, tested, and maintained 802.11 b/g Wi-Fi access points and 802.16d PTP and PMP WiMAX microwave radios (5.X GHz - 60 GHz) including Cisco, Aironet, Aruba, Alvarion, Bridgewave, Cielo and Exalt for business-class data and VoIP services (up to 100G).
- Managed and configured CPE and core Cisco routers, switches, APC UPS, and various radio controllers and access points.
- Collaborated with Network and RF Engineering personnel to resolve challenging routing, frequency, and modulation issues as well as managed electrical, operations and tower contractors while meeting demanding schedules for network and maintenance projects.

Education

- Associate in Applied Science | Network Management | Wake Tech (classes)
- Bachelor of Arts | Religion | Saint Andrews Presbyterian College, NC

Certifications

- CCNA (class) | CompTIA Net+ | CompTIA A+
