

RAGHAV WADHWA

Data Analyst

8445631914 raghavcoer@gmail.com Noida, India

SUMMARY

3.7 years of experience in data visualization, reporting, and dashboard creation, leveraging **SQL**, **Power BI**, **Python**, and **Azure** to drive business insights. I am experienced in integrating **AI chatbot** functionality within Power BI, making data accessible and conversational for all users. I bring strong analytical and problem-solving skills, take good decisions, and always focus on learning and improving.

EXPERIENCE

Data Analyst

The Unified Cloud Pvt Ltd

📅 04/2022 –Present 📍 Noida, India

A company specializing in cloud solutions and data analytics

- Designed and developed 100+ **Azure Infrastructure** reports using **Power BI**, **SQL Server**, **DAX**, and **MS Excel**
- Automated report delivery with **Power BI Gateway** for enhanced data accessibility
- Worked as a Data Analyst with skills in **Power BI**, **SQL Server**, **DAX**, and **Excel**, leading to better analysis efficiency.
- Optimized SQL queries to make them faster and improve response time.
- **Built an AI-powered chatbot within Power BI to make reports more interactive, attractive, and optimized.**
- Enhanced reports through improved data cleaning, transforming, loading, modelling, Power Query, DAX, and smart visuals, while also applying **row-level security** for secure data access.
- **Developed 50+ Chatbot POCs** using Lang chain, Azure OpenAI, and NLP to automate data query generation and enable natural language interactions with both structured and unstructured data, reducing analysis time by 30% and improving data accessibility by 45%.

Data Analyst Intern

Tanvika software

📅 10/2017 - 04/2018 📍 India

A software company focused on delivering analytical solutions

- Compiled data from client in raw excel format or from SharePoint; increased analysis by 50% using pivot table G Vlookup
- Designed power BI dashboard for financial claims portfolio of 200+client accounts to review the KPI; resulted in 25% improvement in collection rates and 30% reduction in claim denial rates
- Directed teams in coordinating efforts to address billing issues, facilitating payment discussions that achieved a 15% improvement in client satisfaction

EDUCATION

Bachelor of Engineering

College of Engineering Roorkee

📅 03/2018 - 04/2022 Roorkee, India

KEY ACHIEVEMENTS

- **SQL Gold Badge – Hacker Rank**
- Transformed data with Power BI, won industry award. Achieved a 95% client satisfaction rate for delivering insightful data visualizations that exceeded expectations

SKILLS

Advanced Excel , Power BI Desktop

DataVisualization, DAX, SQLServer,

MSFabric, Python, Langchain, LLM,

AZURE Fundamentals, OpenAI, NLP

AzureDataFactory

PROJECTS

Power BI

Azure Infrastructure Monitoring

- Designed and deployed end-to-end Power BI dashboards for Azure resources (VMs, storage, networking, and cost optimization)
- Leveraged SQL Server + Power Query for ETL, created automated KPIs for uptime, usage trends, and cost analysis
- Integrated with Power BI Gateway for real-time monitoring, improving operational efficiency by 30% and reducing Azure infrastructure costs by 20%

ADF

Azure Data Pipeline Automation

- Designed and implemented ETL pipelines in Azure Data Factory to ingest, transform, and load large datasets from multiple sources (SQL Server, Blob Storage, and APIs) into a centralized data warehouse
- Automated scheduling with ADF triggers and integrated data validation steps, reducing manual processing by 40%

AI-driven Analytics Assistant

- Created a chatbot using LangChain and Azure OpenAI that can answer real-time questions, summarize data, and give quick insights. This made reports easier to access, improved decision-making, and cut analysis time by 30%.
