Projects 2

Domain: Health Insurance

Client: Humana

Environments: Power BI Desktop, Oracle SQL

Humana is a health insurance company that provides a wide range of products and services to meet diverse healthcare needs. It offers comprehensive health insurance plans tailored for both individuals and employer groups. In addition to standard health coverage, Humana also specializes in Medicare services including Medicare supplement plans, Medicare Advantage and Original Medicare, helping customers access affordable and reliable healthcare solutions.

Roles & Responsibilities

- Facilitating the transfer of data from the development system to the staging environment.
- Extracting data from various sources including Excel and SQL Server followed by rigorous validation and subsequent loading into the final destination.
- Demonstrating extensive expertise with Power Query, Power Pivot, Power View and DAX functions.
- Crafting comprehensive drill down and drill through reports. Leveraging the Quick Measure functionality to create nuanced filters, Time Intelligence and Totals.
- Utilizing the Edit Interaction functionality to establish meaningful interactions between visuals.
- Developing sophisticated visualization reports and dashboards using Power BI.
- Possessing substantial experience in implementing Row Level Security (RLS) as an integral part of our security measures.
- Engaging with DAX functions such as Date & Time, Information, Filter & Value, Logical and Text.
- Managing gateways, overseeing refresh schedules and actively contributing to the creation of reports and dashboards

Projects 1

Domain: Healthcare

Client: CVS Health

Environments: Power BI Desktop, Oracle SQL

CVS Health is building a world of health around every consumer. Our unmatched reach allows us to deliver high quality, affordable health care when and how individuals choose. We're on a mission to deliver superior and more connected experiences, lower the cost of care and improve the health and well-being of those we serve.

Roles & Responsibilities

- Created interactive dashboards in Power BI for the Clinical project, providing stakeholders with real time insights into clinical trial data.
- Creation of POWER BI Filter like visual Level filters and page level filters.
- Created Dashboards and applied Drill down Drill through functions and created tooltip on sheet level as per requirement and create drill down and drill through reports.
- Updating weekly status and keeping track of overall development status for the project.
- Experience in performance analyzer for performance tuning and query optimization.
- Extracting data from multiple sources like flat files, Excel and SQL server and validating data and loading into Final Destination.
- Created calculated columns and measures using Dax and prepared report and dashboards in power bi.
