

STANLY JUSTIN DIRAVIAM B

POWER BI DEVELOPER - 4.8 YEARS

✉ stanlyjustindiraviam92@gmail.com ☎ 8838996488 📍 Chennai

Enhance data analysis expertise by utilizing Power BI to explore, analyze, and visualize data from diverse sources. Emphasize understanding business requirements, identifying key performance metrics, and deriving actionable insights to support informed decision-making.

PROFESSIONAL SUMMARY

Venzo Technologies, Power BI Developer

November 2018 - Present

- With 6.8 years of experience in the IT industry, including 4.8 years of expertise in BI Tools using Power BI Desktop, Power BI Service, and SQL Server. Proficient in data modeling, report development, DAX calculations, and performance optimization, enabling effective data-driven decision-making.
- Hands-on experience working with Power BI Desktop and Power BI Service to create and maintain effective reports and dashboards.
- Developed new reports and dashboards, as well as enhanced existing ones based on client requirements.
- Designed data models and maintained relationships between data using various joins to ensure seamless data flow.
- Analyze large datasets from multiple sources, ensuring data accuracy, completeness, and integrity.
- Develop, design, and maintain interactive Power BI dashboards and reports that provide business insights and track KPIs (Key Performance Indicators).
- Integrated data from multiple sources into detailed paginated reports to provide insightful business analysis.
- Utilized Rest APIs to integration in Power BI.
- Skilled in writing complex DAX formulas to derive meaningful insights from raw data.
- Experienced in extracting, transforming, and loading data from various sources using Power Query, SQL, and other data integration tools.
- Familiar with integrating Power BI with various data sources, including Excel, SharePoint, SQL Server, and cloud platforms like Azure.
- Published and shared reports on Power BI Service to enable team collaboration and decision-making.
- Managed deployment and scheduling of data refreshes to ensure up-to-date reports and dashboards.
- Integrated data from multiple sources into detailed paginated reports to provide insightful business analysis.
- Installed and configured On-Premises Data Gateway to facilitate secure data access between internal systems and Power BI.
- Experienced in writing SQL queries to support data extraction and reporting in Power BI.

Skills

- | | | | |
|----------------------|----------------------|------------------|------------------|
| • Power BI Desktop | • Data Modeling | • SQL | • Report Builder |
| • Power BI Service | • DAX Function | • Oracle | • SSIS/ SSRS |
| • Power Query Editor | • Data Visualization | • Advanced Excel | • ETL |

PROJECTS

Project # 3 - American Eagle (Domain - Retail - Sales)

Tools Used - Power BI Desktop, Power BI Service, Report Builder & SQL Server

DESCRIPTION :

American Eagle Outfitters (AEO) is a leading global retailer specializing in trendy, high-quality casual wear and accessories for young adults. Known for its stylish denim, comfortable apparel, and inclusive brand identity, AEO focuses on self-expression, sustainability, and exceptional customer experiences. With a strong presence in both physical stores and online platforms, the brand continues to set trends in the fashion industry.

- Gathered and analyzed requirements for Power BI reports from business users and executives to align reporting with business needs.
- Presented analytical insights to internal and external teams, explaining data relevance in relation to Key Performance Indicators (KPIs).
- Delivered reports on time, ensuring accuracy and usability for business decision-making.
- Effectively utilized Power Query and DAX for advanced data calculations and transformations.
- Implemented filtering techniques, including visual-level filters, page-level filters, and slicers, to handle large datasets efficiently.
- Developed diverse visualizations, such as bar charts, line graphs, pie charts, maps, Gantt charts, bubbles, highlight tables, and matrix tables for enhanced reporting.
- Applied Power BI joins, including inner, outer, left anti, and right anti-joins, to manage complex data relationships.
- Designed meaningful dashboards by following best practices in data visualization, ensuring clear and impactful reporting solutions.

Project # 2 - Verily (Domain - Healthcare)

Tools Used - Power BI & SQL Server

DESCRIPTION :

Verily focuses on data-driven healthcare solutions, leveraging advanced analytics to improve patient outcomes and medical research. By integrating data from multiple sources, it enhances clinical insights, treatment effectiveness, and operational efficiency. The company applies data modeling, visualization, and reporting to drive informed decision-making in healthcare. Through innovative technology, Verily transforms healthcare analytics for better patient care and medical advancements.

- Loading the data from development system to staging environment.
- Extracting data from multiple sources like flat files, Excel, SQL server and cloud platforms like Azure for validating data and loading into Final Destination.
- Good Experience on Power Query, Power Pivot, Power View and DAX functions. Creating a drill down and drill through reports.
- Created charts like Lines, Pie, Bar, Scatter, Area, Tree map, Filled map, Gauge, Funnel, Single Card, Multi row card, Slicer etc.
- Used Quick Measure functionality to create Filters, Time Intelligence and Totals.
- Used Edit Interaction functionality to create Interaction between Visuals.
- Developing Visualization reports and Dashboards using Power BI.
- Have good Experience to Implement RLS as part of security.
- Working on DAX functions like Date & Time, Information, Filter & Value, Logical, and Text.
- Working with gateways and scheduling the refresh and Creating reports and dashboards.
- Involved in installing and configuring gateway services for Power Bi Desktop.

PROJECTS

Project # 1 - Allied Insurance (Domain - Insurance)

Tools Used - Power BI & Oracle

DESCRIPTION :

Allied Insurance is a trusted provider of personal and commercial insurance solutions, offering coverage in auto, home, business, and specialty insurance. The company focuses on delivering customer-centric policies, efficient claims processing, and risk management solutions to ensure financial protection for individuals and businesses. With a strong commitment to reliability and innovation, Allied Insurance continuously enhances its services to meet evolving market demands while maintaining a reputation for excellence and integrity.

- Optimized data processing by creating hierarchies and defining relationships between attributes to enhance report performance.
- Established connections between measure groups and dimensions based on business needs, ensuring accurate data modeling.
- Hands-on experience with M-Code, efficiently handling data extraction and transformation processes in Power Query.
- Developed calculated measures and columns in DAX to support advanced analytics and business reporting needs.
- Designed and published reports using Power BI Desktop, ensuring seamless deployment to Power BI Service for end-user access.
- Leveraged custom visuals and interactive dashboards to enhance data storytelling and improve decision-making.
- Implemented filtering techniques, including visual-level, page-level, and report-level filters, along with slicers for handling large datasets.
- Built multidimensional and tabular data models using SQL Server Analysis Services (SSAS) to support complex queries and reporting.

EDUCATION

- | | |
|--|-------------|
| ● Master of Engineering - JJ college of Engineering and Technology | 2015 - 2017 |
| ● Bachelor of Engineering - CARE School of Engineering | 2010 - 2014 |
