- **Worked on CDS, AMDP and ODATA technologies.**
- **Have good hands-on experience on Interfaces, WRICEFW, RFCs, Classes, ALE IDOCS, and BAPIs, MM, PRODUCT COSTING**
- Preparing the TUT document for the object.

Projects:

SAP Upgrade S4 Hana 2023 version:

- Participated in SAP Upgrade project from the version 1909 to S4 HANA 2020 version.
- Performed SPDD activities to adjust the Data dictionary objects as per the 2023 Version.
- Identified the ATC check errors which priority 1 and 2 checks and cleared the errors as per the SAP note information.
- Applied new ABAP-7.4 syntaxes wherever applicable in the old code.
- Moved these changes from Dev to Quality system via CHARMS process.

IBU Project:

- Build a KPI dashboard in SAP for Tyson internal using CDS views, ODATA and Fiori Tiles.
- Build a service playbook application for ABAP development estimations and to track the development status.
- Developed a report for Mass PO upload with excel sheet with new customer fields with extension-in concepts for Import proof number and license number.
- Worked on VOFM routine to calculate the pricings for Gross price, Distribution Fee and volume discount.
- Developed a report to upload the demands for material based on Daily, weekly, monthly, and periodically based on the user requirement.
- Implemented a BTE to trigger an outbound IDoc whenever the accounting document created via FB01 transaction.

- Implemented an enhancement to Change the Payment Terms for Intercompany invoice billing for Italy company codes.
- Worked on a ticket to calculate the tax value including the Markup value to print in the form, this is done in OData services by redefining the INVOICEITEMSET_GET_ENTITYSET method in DPC_EXT class.

Titan:

- Implemented a BRF+ setup to automate the email triggering process for Invoice creation and Order confirmation for the users maintained in BP.
- Prepared a report to update the Weekend date and cost center for process orders to consider this in EAP Optimization report by using OOABAP.
- Developed Outbound interfaces to ASRS ASN, Inventory Status change through OData via SnapLogic as middleware.
- Developed Inbound interfaces for ASN Confirmation, ASN Status update, Inventory status update, Order status update through OData via SnapLogic as middleware.
- Developed a CDS view to display the HU Cycle count variance report as to show multiple HUs like HUMO.

AP Horizon:

- Developed a report to display the quantity and manual blocked report and to send the details in email based on the user input selection.
- Provided the F4 help to the requisitioner (AFNAM) field in ME51N/ME52N/ME53N, while creating the manual purchase requisitioner (PR).
- Worked on CRUD operations in ODATA.
- Worked on File upload object with ODATA by using GET_STREAM method.
- Worked on Various ODATA MPC_EXT, DPC_EXT implementations, Function imports, complex types in Gateway service.
- Worked on creating deep entities by using CREATE_DEEP_ENTITY method in ODATA.
- Implemented an enhancement to validate the Username. If the username is not valid then, not allowing the user for further actions.
- For Taulia Non-PO Parked documents, implemented an enhancement in standard BAPI(POSTING_INTERFACE_DOCUMENT), to Changes the Transaction code form FBV1 to FV60.
- Performed a Lead role for this project from Tyson side (Oversite role).
- All the developers were from Accenture company.
- As an Oversight role, I have guided them to understand the Tyson standards and best practices.
- Reviewed the code and documents developed by Accenture TMs, they need to work based on review comments.
- Scheduled weekly standup meeting with Accenture team to collect the updates and passing those to my higher management. All these kinds of lead role performed by me for this project.

SAP Upgrade (S4 HANA 2020 Version):

- Participated in SAP Upgrade project from the version 1707 to S4 HANA 2020 version.
- Performed SPDD activities to adjust the Data dictionary objects as per the 2020 Version.
- Identified the ATC check errors which priority 1 and 2 checks and cleared the errors as per the SAP note information.
- Moved these changes from Dev to Quality system via CHARMS process.

HR Payment Election and Pay slips:

- Developed a report for payment election process for each employee in Tyson. This report will pick the files from SFTP server and process those records into SAP.
- Developed a report to generate a pay slip of each employee and placed those files in SFTP server.

- Worked on Concur HR interfaces for 300, 370 and 720 files.
- Developed a report to display the blocked meat PO invoices.
- Developed an OOPS ALV report to display the GR->IR information of purchase orders.
- Worked on Data Dictionary objects like custom table creations, TMG, Views and Transaction code custom tables.

Project # 4

Client : DXC Technologies
Project : VIM
Duration : Nov 2017 - Till date
Version : SAP ECC 6.0
Role : ABAP Sr. Consultant
Team Size : 15

Project Description:

VIM is a part of Accounts Payable. SAP FI Accounts Payable is used to manage and record accounting data for all the vendors. All invoices and deliveries are managed as per vendor requests. All the payments can be made using checks, transfer, electronic transfers, etc. Invoice against vendor with reference to Purchase Order (or) G/L Account

Objects:
