- Chennai,India

EDUCATION

- AGURCHAND MANMULL JAIN COLLEGE (2020-2023)
- B.Com

SKILLS

- Languages & Scripting
 - Java, JavaScript, Groovy, SQL
- Automation Tools & Frameworks
 - Selenium WebDriver, Cypress, Appium
 - TestNG, JUnit, Cucumber (BDD)
 - Apache POI (Data-driven Testing)
 - Page Object Model (POM), Hybrid Frameworks
- API Testing Tools
 - REST Assured, Postman, Insomnia, ReadyAPI (SoapUI Pro)
- CI/CD, DevOps & Build Tools
 - Jenkins, Maven, Docker, JFrog, Harness
- Version Control & Collaboration
 - Git, GitHub, Bitbucket (optional addition)
 - JIRA, Confluence
- Platforms & OS
 - Windows, macOS, Linux
- Databases
 - MySQL, Oracle, PostgreSQL

NARASIMMAN.R

QA ENGINEER

PROFESSIONAL PROFILE

Results-driven Automation Test Engineer with 2.2 years of experience in Selenium WebDriver, Java, Cucumber BDD, Cypress, Applitools, and Appium, delivering robust automated solutions for both web and mobile applications. Proficient in TestNG, Maven, JUnit, and skilled in Page Object Model (POM), Data-Driven, and BDD frameworks. Experienced in Agile/Scrum methodologies, CI/CD pipelines with Jenkins, and Git/GitHub for version control. Strong understanding of SDLC, STLC, Defect Life Cycle, and testing types including Functional, Regression, Smoke, Sanity, and Integration Testing. Committed to enhancing software quality, improving automation coverage, and minimizing manual testing efforts through scalable automation strategies across multiple platforms.

WORK EXPERIENCE

Citi Bank | Jun 2023 - Present | Domain: Banking

Project Description:

- The project focused on automation testing for Citi Bank’s digital banking platform, covering both web and mobile applications. Modules included account management, fund transfers, bill payments, loan processing, and transaction history. Testing scope included UI automation, mobile app automation, and API automation to ensure cross-platform consistency, functionality, and high performance for millions of users.
- Designed, developed, and maintained automation scripts for web applications using Selenium WebDriver (Java) with Cucumber BDD, and Cypress for end-to-end testing of modern web applications.
 - Automated mobile banking application test cases using Appium for Android and iOS platforms, validating both functional and UI elements.
 - Performed API testing using Postman and API automation with RestAssured, including request/response validation, JSON schema validation, and authentication flows.
 - Implemented Page Object Model (POM), Data-Driven, and Hybrid Framework to enhance maintainability and scalability of the automation framework.
 - Developed reusable feature files, step definitions, and hooks for BDD automation.
 - Created and managed Maven build scripts for compiling, executing, and generating automation reports.
 - Configured TestNG for test grouping, parallel execution, and data providers to improve execution efficiency.
 - Executed Functional, Regression, Sanity, Smoke, and Cross-Browser testing on Chrome, Firefox, and Edge.
 - Conducted Cross-Platform Testing to validate mobile app behavior on different devices and OS versions.
 - Scheduled and monitored automated test suites using Jenkins CI/CD pipelines for nightly builds and regression cycles.
 - Integrated automation reports with Extent Reports for detailed execution logs and screenshots on failure.
 - Validated backend transactions by writing and executing SQL queries in MySQL to ensure data integrity.

Testing Types & Methodologies

- Manual Testing, Automation Testing
- Regression, Integration, Smoke, Functional, UAT, Load Testing
- Agile, Scrum, Sprint-based Testing

LANGUAGES

- English (Fluent)
- Tamil (Fluent)

- Logged and tracked defects using JIRA, collaborating with development and business teams to ensure timely resolution.
- Participated in Agile/Scrum ceremonies — sprint planning, backlog grooming, daily stand-ups, sprint reviews, and retrospectives.
- Provided knowledge transfer (KT) sessions to team members for framework enhancements and best practices.
- Optimized automation scripts to reduce execution time and improve framework stability.

PROJECTS OVERVIEW

- **Banking Portal Automation:** End-to-end automation of Citi Bank’s digital banking modules including login, fund transfers, bill payments, KYC verification, and transaction history using Selenium WebDriver, Java, and Cucumber BDD.
- **Loan & Credit Card Workflow Testing:** Automated application, approval, and transaction workflows for loans and credit card services using Selenium, TestNG, and POM framework.
- **Mobile Banking App Automation:** Utilized Appium to automate Android and iOS mobile banking applications, covering account management, payments, and cross-platform validation.
- **API Automation & Validation:** Created and executed automated API test scripts using RestAssured and Postman for account services, fund transfers, and transaction APIs with JSON schema validation.
- **Continuous Integration & Reporting:** Integrated automated test suites with Jenkins CI/CD pipelines, generating detailed Extent Reports with screenshots for failed scenarios.
